KSE liquidity drops by 35 pct y-o-y

The Monthly Report of the State, Finances and Monetary Administration Accounts

The Ministry of Finance issued the Monthly follow-up report for the State's Financial Administration Accounts for December 2015. Total estimated assets of the current fiscal year 2015/2016, eight months of the current fiscal year, amounted to KD 4,757 billion, or about 35% of the total estimated values of asset revenues during the same period of last fiscal year. About 20% of the total estimated revenue from assets during the current fiscal year is captured by about KD 1,070 billion, which is 35% of the total asset revenues of the current fiscal year.

Despite the high average of all market revenues and the high volatility of the sample, the turnover rate of this sample companies is less than the turnover rate of the entire market and the sample with the highest liquidation value and 23% of 2014 market capitalization value compared to its total market capitalization value. Continuity. Those companies captured about 32.2% of the total turnover value of all market companies.

Kuwait Stock Exchange Liquefied Market Features 2015

By the end of 2015, KSE added about 10.717 billion, of which about 27.5 billion of the total assets, which have become scarce, have been allocated to the current fiscal year. The performance of Kuwait Stock Exchange (KSE) for the last week (4 November-8 November 2015) ended and was characterized by weak performance of Gulf markets within the sample. Out of 14 market sectors, only 3 sectors had weak performance, less than 10%, and 10 sectors recorded medium to long term losses.

Comparative Performance of Selected Stock Markets - December 2015

2015 ended and was characterized by weak performance of capital markets within the sample. Out of 14 market sectors, only 3 sectors had weak performance, less than 10%, and 10 sectors recorded medium to long term losses.

Speculative Companies’ Share of Total Listed Companies

Speculative Companies’ Share of Total Listed Companies

Kuwait Public Authority for Information and Communication (KPAIC) announced that the total value of local and imported goods imported into Kuwait during the first quarter of 2015 amounted to KD 3.448 billion, with a trade balance surplus in favor of the GCC states by about USD 6.877 billion. These figures do not carry any significance because Kuwait uses the exchange rate of the EUR/USD, which is the official exchange rate of the Gulf Cooperation Council (GCC). The EGP/USD, which is the official exchange rate of the GCC, is not used in Kuwait. Additionally, the KSE’s liquidity is largely influenced by the behavior of Kuwaiti residents.

Development of Events with Iran

Since the start of the Iranian revolution in 1979, the relations between Kuwait and Iran have been strained. In 1992, the two countries agreed to normalize their relations, which were strained during the Gulf War. However, due to the political conditions in Kuwait, the relationship between the two countries has not improved significantly.

Kuwait’s economy is heavily dependent on oil exports, which account for about 90% of its total exports. However, the fall in oil prices has had a significant impact on the Kuwaiti economy, as oil revenues make up about 90% of the country’s total income. The government has announced a number of measures to address the economic challenges, including cuts to government spending and increased taxation.

The Kuwaiti government has also taken measures to diversify its economy, including investments in the private sector and the development of new industries. However, the low oil prices have made it difficult for the government to implement these measures, as it has been forced to cut back on spending in order to maintain its fiscal balance.

KSA’s economy is also heavily dependent on oil exports, which account for about 80% of its total exports. The fall in oil prices has had a significant impact on the Saudi economy, as oil revenues make up about 80% of the country’s total income. The government has announced a number of measures to address the economic challenges, including cuts to government spending and increased taxation.
