Aoun asks Riyadh to explain Hariri's absence

**O Sheikh Tamim, this is the soul of ‘Kulaib is restored’**

BEIRUT, Nov 11, (Agencies): The United States and France have expressed their support for Lebanon's political stability amid heightened tensions between Beirut and Saudi Arabia.

The US State Department has welcomedvasive comments by Saudi officials that seem to target the political stability of Lebanon as a whole, but also the relative peace maintained by its coalition government since Prime Minister Saad Hariri's resignation on Oct 26.

In an interview with Al-Jarallah, KAC spokesperson Ahmed Al-Jarallah said Kuwait is concerned about Hariri's absence, especially as the former PM's visit to Saudi Arabia on Saturday might spark a “fierce” reaction, as the president called for more support to ensure the safe return of Kuwaiti nationals from Lebanon.

The statement attributed the Kuwait Airways Corporation's decision to cancel its flights and resume normal operations to its DSHE's decision against any negative measure against any negative impact that might take place.

After 10 days of flight suspensions, the DCHE decided to resume flights after it was taken into consideration that the safety of the passengers is very high.

To ensure the safety of the passengers, KAC also took into consideration some necessary precautions and measures to ensure the safety of the passengers.

The Airways added that their operation in Kuwait and the operation of Kuwait Airways Corporation (KAC) in Kuwait will not be affected.

The operation in Kuwait and the operation in the United States will be carried out as usual.

Kuwait’s philanthropy continues to help ‘needy’ around the world

130 students granted scholarship in Al-Dhefeeri

KUWAIT CITY, Nov 11, (KUNA): The State of Kuwait continues to provide aid for the needy whether in form of basic living needs or even educational services, keeping its status as a global Humanitarian center.

Kuwaiti Ambassador to Tokyo, Al-Dhefeeri announced last Saturday that Kuwait Direct Aid Society (KDAS) granted scholarships to 150 students in Tunisia.

He revealed that the money was transferred as a result of cooperation between the two countries, indicating that such initiatives also carry along strong brotherly sentiments on all levels. It also clearly expresses the close ties between the two countries despite their geographical distance, he said, pointing out that KDAS initiatives are aiming at helping students in order to ensure their education.

Direct Aid’s section in Tunisia has seen a significant development over the past decades, Al-Dhefeeri said, noting that the society started providing financial assistance to students in 1995. Since then, KDAS has founded a number of schools and educational systems in Tunisia, he added.

The grant was given to 100 students directly to help with their living needs, while the remaining 50 students were granted scholarships to study in Kuwait.

In the same context, Al-Dhefeeri disclosed the cooperation between KDAS and the Tunisian government towards the opening of a Kuwaiti school in Tunis, to be named after Sheikh Sabah Al-Ahmed Al-Jaber Al-Sabah, who is the father of the current Emir.

Al-Dhefeeri said that KDAS would continue providing scholarships in Tunisia and other Arab countries in order to help students who have limited access to knowledge.

Prior to that, KDAS announced that it would provide more than 200 scholarships to students in Jordan, Lebanon, and other Arab countries.

This is not the first cooperation KDAS has made with another country in the region, as the society has already provided scholarships in Oman and Saudi Arabia.

KU organizes workshop for gifted writers

KUWAIT CITY, Nov 11: Work on the design of the major refurbishment of Kuwait International Airport has started. A report published on the website of the Kuwait National Cadastre and Survey Department, which is in charge of the project, said it is the design change of the project.

In a bid to improve aviation safety and accommodate more passengers, the country decided to implement this big plan that aims to include the establishment of a new runway, a midfield terminal, a new central market, and an additional 50 new publishers participating for the first time.

An undisclosed official was quoted saying that the expansion project is set for closer and sustained cooperation in all areas, including pertained by presenting their publications at the Kingdom. bin Al-Ghanim.

Kuwaiti initiative reflects its solid relationship with Tunisia, he said, pointing out that KDAS is trying to increase the size of the educational programs and efforts in bringing such a distance closer.

He noted that 10 beneficiaries are currently studying in Kuwait, while 90 are participating in KDAS long-term projects.

The total aid offered to the Sri Lanka Red Crescent Society (SRCS), KRCS’ head of the field operations, Masri, said in a statement to KUNA that the funds would be used to provide assistance for the victims of the earthquake, including 250 small temporary houses, 1000-2000 sheets, blankets, provision and services for the victims.

He told KUNA last Sunday that the society started constructing this facility last year, explaining that it would receive educational and professional training for the orphans in particular.

Three floors will accommodate 420 orphans, with the 2nd and 3rd floors reserved for girls and the 1st for boys.

The 42nd Kuwait Book Fair, to be held on Nov 15-25 featuring around 1,000 publishing companies from 65 countries, will see around 100 new publishers participating for the first time.

As usual, extracurricular cultural events will be held at the American University in Kuwait, while extra-activities will be held at the Kuwait University and Kuwaiti University, he added.

The audience will present their publications through the book fair, held on Nov 15-25 featuring around 1,000 publishing companies from 65 countries, will see around 100 new publishers participating for the first time.

Al-Kadhimi: ‘Kuwait in security frontlines’

Prime Minister, H.E. Sheikh Haswani Al-Kadhimi, said on Saturday that the country was in the forefront of providing security and safety to the people of the region. He was speaking during the opening ceremony of the 14th sitting of the National Assembly.

Al-Kadhimi, who was accompanied by the Council of Ministers, said during his speech that the country was going through a period of change in the security and military operations with the support and leadership of H.E. Sheikh Sabah Al-Ahmed Al-Jaber Al-Sabah.

The Prime Minister said that the country was in the forefront of providing security and safety to the people of the region in particular and the Arab world in general.

Al-Kadhimi said that the country was going through a period of change in the security and military operations with the support and leadership of H.E. Sheikh Sabah Al-Ahmed Al-Jaber Al-Sabah.

He congratulated the security and military forces for the work they have done in this period.

Atia Bani, a Palestinian child, was able to go to school and do other income family, Khedher said, in almost a year ago.

KRCS helps Palestinian child with artificial limbs

Arwa, a Palestinian child, currently suffers from a limb defect due to financial contributions by the Kuwait Red Crescent Society (KRCS), almost a year ago.

KRCS is responding to the appeal for help with the daily duties due to the medical help provided by the Kuwait Red Crescent Society, said Rebiya Kheder, the KRCS representative in Palestine, in a statement.

The KRCS had responded to an appeal for help by Bara's new-income family, Kheder said, indicating that other Palestinian children with amputated legs had received such help and became able to work per-hour.

Kuwait hosts conference on the suffering of Palestinian children

KUWAIT CITY, Nov 11, (KUNA): Kuwait hosted a two-day conference on the ‘suffering of the Palestinian children amid violations by Israel, the occupation power, of the Convention on the Rights of the Child,’ with broad high authorities participation.

The conference, which was held under the title of the Palestinian children under International Law and the Convention on the Rights of the Child, the role of the society and the states, focusing on the current situation in the Convention in favor of the Palestinian children, was sponsored by the Kuwaiti Ministry of Social Affairs and Labor and the International Islamic Charitable Organization.

One of the doctors fixing the artificial limbs on the child.

The conference includes the main axes of the conference, which is the presentation of the Palestinians living conditions for the Palestinian children, the surveys and findings, the barriers and obstacles to be overcome, the legal and political requirements, the resolutions and recommendations, the outcomes of the conference, and the conclusion of the conference.

Tahboub told KUNA.

the causes behind the Arab Spring. Since then, he has become a well-established leader in the Arab world. His influence extended to the GCC countries, as well as his defense forces were well known in the region. After the Arab Spring, the number of Arab countries that have been part of the GCC has increased, from 12 in 1981 to 16 in 2017. The GCC is an organization of Arab countries that work together to improve their economies, and it is led by the United Arab Emirates, Qatar, Kuwait, Oman, Saudi Arabia, and Bahrain.

The GCC countries are known for their diverse political and economic systems. While some countries in the GCC, such as Saudi Arabia, are authoritarian regimes, others, such as Qatar and Oman, have more democratic systems. The GCC has also been involved in various conflicts in the region, including the war in Yemen.

Continued from Page 1

The problem of延长 is a common issue in the region, as many countries struggle to balance their budget and maintain economic stability. One reason for this is the high cost of oil, which is the main source of revenue for many GCC countries. As oil prices fluctuate, the economies of these countries are also affected, leading to a need for extended budgets.

Immigration case withdrawn: The U.S. immigration agency has withdrawn a case against a Syrian man who sought protection from the Syrian government, citing a change in the administration's policies.

Supreme Court: The Supreme Court has decided to hear arguments twice in the case of an immigration case against a Syrian man who is seeking to withdraw his case.

Lawmakers on Sharpley: The House Intelligence Committee asked Christopher Sharpley, the current acting inspector general, about complaints against him.

Deficit worries complicate tax cuts path: Republicans hold a tenuous 52-48 majority in the Senate, which means that any tax cut proposals in the Senate will require a supermajority of 60 votes, which may prove difficult to achieve.

GDP unease shadows passage of bills: The growth in the economic output of the U.S. in the third quarter was only 2.9 percent, which is below expectations, and could complicate passage of tax bills working their way through Congress. The Senate voted 51-49 in favor of a Senate Republican tax plan that would add $1.5 trillion to the federal deficit over 10 years to the annual budget projections of the nonpartisan Joint Committee on Taxation. The Senate Finance Committee has approved legislation that would cut personal income taxes for the richest Americans, but the House version of the plan would add $1.78 trillion to the deficit over the next decade. The House version of the plan would add $1.5 trillion to the deficit over 10 years.

Unease among Republicans about a major legislative victory: Republican Senator Jeff Flake of Arizona said he did not want tax cut legislation that would add $1.5 trillion to the federal deficit over 10 years, as it would be a “futuristically flawed budget buster.” Republican Senator James Lankford said in a statement, “We need to work on tax relief, helping the middle class and confront our federal debt.”

Dissolved the process providing confidence in the current administration: Republicans hold a tenuous 52-48 majority in the Senate, which means that any tax cut proposals in the Senate will require a supermajority of 60 votes, which may prove difficult to achieve.

The Kremlin-backed broadcaster, formerly known as Russia Today, said earlier this week the US Department of Justice had given it until Monday to register its US operations as a foreign agent under the Foreign Agents Registration Act, which states that foreign entities representing foreign political interests in the US must register as foreign agents.

"We are disappointed, as they say in these situations," Putin said.

"They went the route of registering it as a foreign agent. This is an attack on freedom of the media," Putin said.

The uproar led the US Justice Department to demand RT to cooperate with American investigators as a "foreign agent," under the Foreign Agents Registration Act, which allows American citizens to represent foreign political interests in the United States.

"That's not the way to deal with America," Putin said.

"It's not for us to determine whether he means it," Trump said, noting that Putin is a "great leader" and arguing about whether or not "cause that whole thing was set up by the Democrats."

And Trump danced around the question of whether he believed Putin's denials, telling reporters that he believed Putin, but made clear he's not interested in meddling in the election.

"I believe Putin when he tells me," Trump told reporters.

"We're not interested. There's no Russia meddling with our election," Trump said.

"We're not interested. There's no Russia meddling with our election," Trump said.

"I would havepressed the issue would have accomplished little," Trump said.

"He said he was not interested in meddling in our election. We did not do what they said we should do," Trump said.

"I am not interested in meddling in someone else's election," Putin said.

"We are not interested in meddling in someone else's election," Putin said.

"We are not interested in meddling in someone else's election," Putin said.

Meanwhile, US President Donald Trump said he made clear on Saturday he is not interested in "continuing professional work." Putin said.

"They are disappointed as they say in these situations," Putin said.

*Health emergency*

Anger rises as ‘toxic’ air chokes New Delhi

NEW DELHI, Nov 11 (ABP): Between 500 and 1,000 tonnes of toxic smog virtually encircle India’s capital, traps the people’s health and hits their lung functions, as the worst pollution in 10 years has settled in the sprawling city, according to a study.

Professor Sunil Kumar told The Asian Age that the entire population of New Delhi was breathing toxic air for 10 years in a row. “The pollution in the city has affected the health of the people of the country,” he said.

Kumar said the worst pollution was in the months of October and November. “The air pollution is so severe that the city is like a city of dead,” he said.

“People are suffering from coughing, wheezing, chest discomfort, sore throat, headaches and skin irritation,” he added.

The study conducted by the Indian Council for Medical Research (ICMR) in the city showed that the air pollution was 10 times more than the World Health Organization’s (WHO) standard.

Kumar said the WHO had declared New Delhi as a ‘health emergency’ and had recommended several steps to reduce the pollution.

The pollution in the city was caused by industrial and vehicular emissions and also by the burning of agricultural waste.

The ICMR study had also recommended that the government should take immediate steps to control the pollution.

The pollution in the city had also affected the economy of the country, with the cost of premature deaths due to air pollution estimated to be Rs 2.5 lakh crore per year.

The government had announced several steps to control the pollution, including the use of cleaner fuels, the use of public transport and the closure of factories.

However, the pollution levels in the city had not improved, and the people were still suffering from the effects of the pollution.

The ICMR had also recommended that the government should set up a Pollution Control Board to monitor the pollution levels in the city.

The government had also announced that it would set up a Pollution Control Board to monitor the pollution levels in the city.

However, the people were still suffering from the effects of the pollution, and the government had not taken any effective steps to control it.

The pollution in the city had also affected the health of children, with the incidence of respiratory diseases among children increasing in recent years.

The pollution in the city had also affected the health of the elderly, with the incidence of heart diseases among elderly people increasing in recent years.

The pollution in the city had also affected the health of the women, with the incidence of breast cancer among women increasing in recent years.

The pollution in the city had also affected the health of the children, with the incidence of asthma among children increasing in recent years.

WASHINGTON: The US military announced Thursday it had killed “several militants” in an airstrike against Al-Shabaab in Somalia, as the country continues to receive some funding from Syria and Iraq, a report by UN sanctions monitors said Friday.

The faction loyal to Sheikh Abdulqader Mumin was targeted by US drone strikes last week in the first US operation targeting IS in the Horn of Africa, US Africa Command said.

The report was released two weeks after a similar strike was carried out “in coordination with the Federal Government of Somalia,” the US Africa Command said.

The strike was carried out “in coordination with the Federal Government of Somalia,” the US Africa Command said in a statement.

Cambodia seizes on deals
Weary lead farmers fight in land rights

The government is reviewing all ELCs, and those with no consent may be cancelled and the land returned to users, officials say.

‘The last time in Earth’s history that CO2 concentrations were at 450 ppm, sea level was 25 metres (80 feet) high - and the last time that sea level was this high was around 120,000 years ago, during a period of global warming at two degrees Celsius above pre-industrial levels.”

A Bornean clouded leopard and her two cubs were caught on camera near a road in Sabah, Malaysia, in a habitat that has been in decline for years. This little-known species is now listed as endangered by the IUCN. The mountainous range in Sabah where the clouded leopards were seen is a key habitat for many other species, including the Sumatran tiger and the Bornean orangutan.

A spokesperson for the government said the process was followed in all the ELCs, and that complaints were being examined. “We want to resolve land disputes involving sugar companies in four provinces, including Preah Vihear,” she said.

“Tep Them’s family has grown rice, reared cattle and monkeys. In 2010, they were forced to leave their village and farm land, where three generations had cultivated when the government destroyed it for a sugar plantation,” she said.

“Like the rest of the community in Prame in northern Cambodia, Them and her neighbours are not among them. Cambodian officials have set up a working group to resolve land disputes involving sugar companies in four provinces, including Preah Vihear,” she said.

“The only question is how fast.”

“The government promised that this transformation will bring about development and increased profits. Aboriginal peoples and land rights activists have long argued that the sugar industry’s claims of local benefit are often disingenuous.”

“For 2 C, it is guaranteed that we will reach the 1.5 Celsius target,” Hansen said. “Beyond 2 C, we are talking about 2.75 billion more people that will suffer climate change. Right now, we have 1.5 billion people who already have no food, water, or shelter.”

“Every year, about 300,000 forest fires are burning across the country, destroying millions of hectares of land. In 2015, the United Nations declared that deforestation is the single greatest threat to biodiversity.”

“Australia is now one of the world’s top 10 carbon emitters, according to the United Nations Framework Convention on Climate Change (UNFCCC).”

“Australia’s contribution to the basic science of climate change is fundamental to our current understanding — we owe him a debt of gratitude.”

“The government is reviewing all ELCs, and those with no consent may be cancelled and the land returned to users,” officials say.

“By coincidence, Hansen was about to publish a sugar study that concluded the failure of the ELCs should be reversed.”

“Tep Them and her neighbours are not among them. Cambodian officials have set up a working group to resolve land disputes involving sugar companies in four provinces, including Preah Vihear,” she said.

“The only question is how fast.”

“The government promised that this transformation will bring about development and increased profits. Aboriginal peoples and land rights activists have long argued that the sugar industry’s claims of local benefit are often disingenuous.”
**‘Depression as legacy’**

The Balkan blues on screen at Film festival.

This year’s festival includes the director’s identity-real movie, “Smile and Wave,” which premiered in 2019. The film follows an Iranian filmmaker who is invited to a film festival and finds himself grappling with the legacy of his country’s past. "The film is about the emotional and political challenges of making a film in Iran," said the director. "It’s a story about the difficult choices filmmakers face when they try to address the past."

Iran’s Oscar submission causes stir

"Upon” gets warm welcome at Tunisia festival

Iran’s Oscar submission, “Upon,” has caused a stir at the festival, with audiences praising its portrayal of a young girl and her struggle to escape a difficult situation. "The film captures the pain and resilience of the young girl and her family," said one reviewer. "It’s a powerful and moving film."
NEW YORK, Nov 11, (AFP): Kristen Stewart reflects on her "ridiculous" honorary Oscar.

Of the right's two other see-saw victories — with Donald Sutherland and cinematographer Charlie Wachtel from "Thor: Ragnarok," Stewart has been nominated. She knows a win is "a long, long time coming" and "it's a new era for her."

"I can't imagine what it was like to do it 10 years ago," she said.

"So many people have been on my mind this week, and it's a tool to make other people feel better."

"I don't want to waste her time," Stewart recalled in an interview. "I'm always happy when some of the risk is involved."

Introspective Eminem back with fresh sound

NEW YORK — Nov. 11, 2017 — (AP) — Rapper Eminem is back with a fresh sound — an introspective take that leaves behind the explicit lyrics that launched his career.

Eminem, the up-and-coming rapper who earned his reputation on mixtapes and in the underground rap scene, has been known for his explicit and aggressive style. His new album, "Revival," is his first since 2013's "The Marshall Mathers LP 2," and it marks a departure from his previous work.

Eminem's new album includes a track called "Walk on Water," which features a sample of David Gilmour's classic "Comfortably Numb." The song is a departure from his previous work, which was characterized by its aggressive and explicit style.

In a series of social media posts, the 45-year-old Eminem said he was working on a new album, "Revival," which would be his first since 2013's "The Marshall Mathers LP 2." He said the album would feature more mature themes, and that he was looking to explore new sounds.

Eminem gave no further indication on the release date of "Revival," which is mostly expected to drop at any time between now and the end of the year. The album's official release date but is expected to drop at any time between now and the end of the year. The album's official release date is not known.

The unexpected downbeat song — which features hip-hop hitmaker Future and Ed Sheeran, who crossed her, “I don’t regret it one bit ’cause he had it coming.”

On "I Did Something Bad," Swift tells the story of her life in the last two years — going from tabloid drama to falling in love.

Swift is in a fighting spirit — and the odds are against her. She's striking on the exceptional pop effort, she has mastered it. The production level has enhanced, with little nuanced sounds throughout the album. Including the "B" version — giving the tracks additional appeal. A panel of 20 judges, representing all 50 states, decided on the song 'Reputation' — that was about "Reputation," but it’s music, and you’ll discover pop gems.

On:/// "The rhyme has to be perfect / The delivery flawless / 'Cause I'm hitting the mark / ’Till I go sit in the car, listen and pick up the lyrics / And so I took an ax to a mended heart / And slept for the first time / But this step just be another misstep? / To tarnish whatever the giant sound of the album, proving that the "Reputation" era was not over.

The unexpected downbeat song — which features hip-hop hitmaker Future and Ed Sheeran, who crossed her, “I don’t regret it one bit ’cause he had it coming.”

Taylor Swift's new album, "Reputation," was released on November 10, 2017. The album features 13 tracks and has already surpassed those from last year. The album's collaborative release date but is expected to drop at any time between now and the end of the year.

Swift's 3rd studio album, "Reputation," was released on November 10, 2017. The album features 13 tracks and has already surpassed those from last year. The album's collaborative release date but is expected to drop at any time between now and the end of the year.

Swift's 3rd studio album, "Reputation," was released on November 10, 2017. The album features 13 tracks and has already surpassed those from last year. The album's collaborative release date but is expected to drop at any time between now and the end of the year.

GUST holds first alumni reception

KUWAIT CITY, Nov 11: Gulf University
for Science and Technology (GUST) today announced that it had held its first official alumni reception recently, under the auspices of GUST Board of Trustees Chairman, GUST President, top management representatives, and over 100 alumni on its grounds.

The aim of the event was to interact with the alumni, and strengthen alumni relations with the university. Present at the event were GUST President, top management representatives, the GUST Board of Trustees, and over 100 alumni on its grounds. The event was held in the university’s main hall.

The event took place on November 11, 2017, and was attended by over 100 alumni from different countries. The event was organized by the Alumni Office, which caters to all alumni needs from organizing events to arranging benefits and services for alumni.

The event was opened by the GUST President, who welcomed the alumni and thanked them for their continued support.

Alumni were also given the opportunity to interact with the university’s president, who welcomed them and thanked them for their continued support.

The event also included various activities, such as networking sessions, a live performance, and a panel discussion.

The event was a great success, and the alumni were very pleased with the university’s efforts to maintain strong relationships with them.

In conclusion, the GUST Alumni Reception was a great success, and it is hoped that it will continue to be held in the future. The university is committed to maintaining strong relationships with its alumni, and it is hoped that this event will be the first of many.
Recovering, recycling old tires ... a genuine initiative

By Dr. B. Roy
Special to the Arab Times

Primary School in Kuwait, was given this opportunity because of environmental pollution. It would result in releasing carbon monoxide among many other harmful gases. AT: How did you get interested in the subject? Lamba: At Makuen Times, being a leading tire user and service provider in Kuwait, was given the opportunity by some stakeholders to take up this project of thinking of putting a tire recycling facility. Personally, it was a mode of getting past experience in operating and managing a product factory. After this, one has to look into the by-products of its creation and find what it would be to recycle. Recycling, which is global phenomenon where any and all kinds of waste recyclable is highly needed. And both government and private institutions are creating means or ways to create partnerships to help recycle for the larger good of our society. I must add that after the initial reluctance it looked to this project in one way of giving back to society through this initiative.

AT: Would you like to share a certain value addition you have given to the society? Lamba: Used tire recycling is a very established business in many countries worldwide with proper and adequate regulations in place. And there are many different technologies and know-how available to put this to good use. Recycled tires are used as a fuel in cement industries to fire up their furnaces. There is the cryogenic route where the tire in frozen at a certain temperature and then subjected to break it down to powder and crumb, which is not so environmentally friendly. And then there is the mechanical route where the tire is frozen to a certain temperature and then blasted to break it. Again this is not so environmentally friendly. But the most effective one is through a pyrolysis route where the tire is frozen to a certain temperature and then blasted by some stakeholders to take up this project of thinking of putting a tire recycling facility. Therefore, it is a genuine initiative.

AT: What kind of other physical hazards can these dump yards cause? Lamba: I would guess that the tire dump yards could cause fire, but from my point of view, it could also cause some kind of environmental pollution. It would result in releasing carbon monoxide among many other harmful gases.

AT: What are the specific ways in which you are putting these tires to use? Lamba: Our technology is purely mechanical and any kind of environmental damage is totally avoided because of the cryogenic route where the tire is frozen to a certain temperature and then blasted to break it down to powder and crumb, which is not so environmentally friendly. And then there is the mechanical route where the tire is frozen to a certain temperature and then blasted to break it down to powder and crumb, which is not so environmentally friendly. But the most effective one is through a pyrolysis route where the tire is frozen to a certain temperature and then blasted. It is a genuine initiative.

AT: What kind of other physical hazards can these dump yards cause? Lamba: The tire graveyards are environmentally hazardous. Not only do they perfect breeding grounds for mosquitoes, but accidental fires, if not done properly, can also release toxic fumes, and they occupy valuable space. It is because of these reasons that many countries in North America and Europe have banned the dumping of tires and made recycling mandatory. Although our government has not formally made it mandatory, it is definitely more need to be done and soon. Lamba: The Makuen Group of Companies, a leader in the field of automotive products and services in Kuwait, has invested and involved itself in finding environmentally friendly ways to handle this troublesome thing. A mechanical engineer by training, he researched ways of reusing, recycling and making tire into an environmentally friendly or acceptable product. Lamba: I caught up with Gurvinder Lamba on his work in this field so far.

AT: Do you carry any roadmap to your unique and innovative idea? Lamba: Going for an initiative, as I mentioned earlier, we will move into more and more products from recycled tires which will help to bring certain value addition to our resident. Lamba: I am sure you will agree that every resident of Kuwait is not so keen to deal with this problem especially when it is at the doorsteps. As an entrepreneur, I am confident that this initiative is not just a practical game plan very soon. We must start by promoting this idea, perhaps a tire guideline from our own experience, and the kind of recycling and laminate what not to do. For, if we don’t, we are bringing in the awareness of what to do in our future initiatives.

Lamba: The product has been tested and approved by international laboratories and we could market our products and collect our share. A year earlier a devastating fire, just a few minutes away from where we live in Sulaibiya. We had our share of is- sues. Would you like to share some information about that? Lamba: The crisis pressure at the moment is temporary but it is really a tragedy. The tire graveyards create large crowds on the weekend. One of the initiatives is the presentation of designing this in Sharq Golf & Country Club. I must personally speak for the management and staff of Sharq Golf & Country Club. I am personally grateful to their management and staff of Sharq Golf & Country Club. As a responsible member of the society, I am also grateful to their management and staff of Sharq Golf & Country Club. As a responsible member of the society, I am also extending my heartfelt thanks to the government for taking this initiative earlier and yet the problem persists.

Lamba: Reckoning the importance of recycling and the awareness of people towards our environment, it was important that the government is addressing this matter with a practical game plan very soon. We must start by promoting this idea, perhaps a tire guideline from our own experience, and laminate what not to do. For, if we don’t, we are bringing in the awareness of what to do in our future initiatives.

But the most effective one is through a pyrolysis route where the tire is frozen to a certain temperature and then blasted. It is a genuine initiative.

Lamba: You have an event going on at the Golf & Country Club. I am personally grateful to their management and staff of Sharq Golf & Country Club. As a responsible member of the society, I am also extending my heartfelt thanks to the government for taking this initiative earlier and yet the problem persists. It is so vast that the sizable indents on the earth are now visible from space. The expanse of rubber wheels. And that was not all. To quote a story on the world’s biggest tire graveyard. For us in Kuwait, it was something really threatening to our environment.

Lamba: swords to plowshares and learnt what not to do. In fact, we are extending our hands to make a mind-blowing view of the Sahara in Kuwait.

Lamba: Yes, this is true. One of the initiatives is the presentation of designing this in Sharq Golf & Country Club. I am personally grateful to their management and staff of Sharq Golf & Country Club. As a responsible member of the society, I am also extending my heartfelt thanks to the government for taking this initiative earlier and yet the problem persists.  ARAB TIMES, SUNDAY, NOVEMBER 12, 2017 20

What's On
KLIK, a newly formed umbrella organisation of all Filipino photography groups in Kuwait held recently a photo shoot for a cause, the benefit of the Kabayan Cancer Support Group in connection of the Breast Cancer Awareness last month.

A total of 13 photography groups in Kuwait joined in this photo shoot, including hobbyists. The AAB World, Pinoy Arab FM, the Kabayan Cancer Support Group, and others. Participants were rated based on creativity, composition, exposure, clarity, color, and overall impact.

Timing. There will be three rounds of judging:
- Round 1: 50 percent of judges’ scores will be based on the overall theme of the photo shoot.
- Round 2: 30 percent of judges’ scores will be based on technical aspects such as composition, exposure, clarity, and color.
- Round 3: 20 percent of judges’ scores will be based on the overall impact of the photo shoot.

Winners will receive a cash prize of KD 500, a total of KD 3,000 worth of prizes, a Certina Swiss watch, and a certificate of recognition.

The grand prize winner will be announced on November 17th at the Pinoy Arabia FM Station, and a second prize will be given to the runner-up. All winners will be featured in a special edition of the Arab Times.

- Round 3: 20 percent of judges’ scores will be based on the overall impact of the photo shoot.

Winners will receive a cash prize of KD 500, a total of KD 3,000 worth of prizes, a Certina Swiss watch, and a certificate of recognition.

The grand prize winner will be announced on November 17th at the Pinoy Arabia FM Station, and a second prize will be given to the runner-up. All winners will be featured in a special edition of the Arab Times.
**Dear Abby**

Grieving family member urges smokes to quit ‘deadly habit’

By Agnigali Van Buren

Dear Abby, this smoke needs one hand for me. They nag at me so that another just by passing without my lighter and my younger sister. That bad that stinks since its house and show from pulmonary cancer at 74, and an ab-dominating disease. That's when she started smoking and began with a pack a day. At the last check she was smoking 3 packs a day. She died from lung cancer at 44, leaving behind two young children and an empty house. The other day I was browsing on her computer and accidentally opened her browsing history. It was disgusting to see that she had been looking at websites like ‘quit smoking’ and ‘cancer’. She said that she didn’t know how to react. Should I tell my wife? I need to get support for her. What should I do next?

**Dear Abby**

I need to get support for my friend. I have tried so many times to help her quit smoking, but she keeps relapsing. I know that she wants to quit, but she just can’t seem to overcome her addiction. What can I do to help her?

---

**Dear Abby**

I'm considering quitting smoking, but I'm not sure if I can do it on my own. I've tried before and failed. What can I do to increase my chances of success?

---

**Dear Abby**

I'm a smoker and I'm considering quitting. I've heard that nicotine replacement therapy (NRT) can help. What are the options available to me?

---

**Dear Abby**

I'm a 30-year-old smoker and I'm thinking about quitting. I'm afraid of the withdrawal symptoms. Are there any medications that can help with this?

---

**Dear Abby**

I'm a 50-year-old smoker and I'm thinking about quitting. I've heard that bupropion (Zyban) can help. What are the options available to me?

---

**Dear Abby**

I'm a 35-year-old smoker and I'm thinking about quitting. I'm afraid of the withdrawal symptoms. Are there any medications that can help with this?

---

**Dear Abby**

I'm a 45-year-old smoker and I'm thinking about quitting. I've heard that varenicline (Chantix) can help. What are the options available to me?

---

**Dear Abby**

I'm a 25-year-old smoker and I'm thinking about quitting. I'm afraid of the withdrawal symptoms. Are there any medications that can help with this?

---

WASHINGTON, Nov 11 (AFP): One in five adults in the United States uses tobacco on a regular basis, and 15 percent of the population smokes cigarettes, according to US government data released Thursday.

The soaring cost of public health efforts to reduce tobacco use, said the report by the US Centers for Disease Control and Prevention.

“Too many Americans are harmed by cigarette smoking, which is the nation’s leading preventable cause of death and disease,” said CDC director Brenda Fitzgerald.

The latest data is from 2015 and is based on a nationally representative survey of about 33,000 people who are not in jails or other institutions.

It found that 20.1 percent of the US population — some 49 million people — uses tobacco regularly.

Some 87 percent of tobacco users — 42 million adults — reported using a combustible product such as cigarettes, cigars, or pipes.

Just 3.5 percent said they used e-cigarettes, and 3.4 percent used cigars, cigarillos, or filtered little cigars.

Smokeless tobacco — such as chewing tobacco and snuff — was reported by 2.3 percent of adults. Just 1.2 percent used pipes, water pipes, or hookahs.

Men are far more likely than women to smoke. One quarter of men use tobacco, compared to 15 percent of women, said the report.

“The smoking rate has stayed steady in recent years despite public health efforts to reduce tobacco use, said the report by the US Centers for Disease Control and Prevention.

“The US Centers for Disease Control and Prevention (CDC) released Thursday a study which found that one in five adults in the United States uses tobacco on a regular basis, and 15 percent of the population smokes cigarettes. The report confirmed that smoking rates have remained steady in recent years despite public health efforts to reduce tobacco use. The study found that 20.1 percent of the US population, or 49 million people, uses tobacco regularly. Some 87 percent of tobacco users reported using a combustible product such as cigarettes, cigars, or pipes. Just 3.5 percent said they used e-cigarettes, and 3.4 percent used cigars, cigarillos, or filtered little cigars. Smokeless tobacco was reported by 2.3 percent of adults. Just 1.2 percent used pipes, water pipes, or hookahs. Men are far more likely than women to smoke. One quarter of men use tobacco, compared to 15 percent of women. The study also confirmed that smoking rates have remained steady in recent years despite public health efforts to reduce tobacco use.”

The UN’s labour organisation was accused Thursday of capitulating to pressure from tobacco companies after it withdrew an announcement that it had cut financial ties with the industry.

The International Labour Organization (ILO) had initially released a statement that it had cut all ties with so-called Big Tobacco, a relationship that has dogged the Geneva-based body for months.

But the ILO later announced that it had not made a final decision and the issue would be discussed again in March.

ILO spokesman Hans Von Rohland told AFP that the ILO had been in a draft situation in which it was considering a new declaration on the tobacco lobby’s powerful influence.

“These results make it clear that more action is needed to reduce the disease and death caused by cigarette use — and the FDA has announced a comprehensive approach to do just that,” said CDC director Brenda Fitzgerald.

He said the FDA is “seeking to regulate the nicotine content in cigarettes to render them minimally or non-addictive.”

“ILO spokesman Hans Von Rohland told AFP that the ILO had been in a draft situation in which it was considering a new declaration on the tobacco lobby’s powerful influence.”

“The outcome is a result of the ‘invisible hand of the tobacco industry,’ he said, noting that the United States was also in favor of preserving the links.”

Dear Reader,
Credit growth steady at 3.2 pct in August

Credit growth steady at 3.2 pct in August, though growth continued to slow on basis of effects. The month saw a net gain of KD 193 million, as growth eased to 3.2 percent year-over-year. Most gains came from solid household borrowing, while lending from some business sectors. Private deposits bounced back following months of decline. Meanwhile, infl ation and core inflation remained steady. Household lending saw a second consecutive month of growth in August, with growth steady at 7.2 percent y/y. Personal facilities excluding securities lending added a net KD 118 million during the month, double the average monthly gain posting in the first half of 2017. Total household deposits rose 5.2 percent y/y. Non-performing loans fell 26 percent y/y. Government to deposit ratio improved to 7.7 percent from 5.5 percent in August, as the real estate sector growth slowed. Credit added net KD 4 million, with growth dipping to 11.4 percent y/y. Gains were largely funded to automakers and “other sources”, which added KD 91 million and KD 53 million, respectively. Total credit increased by KD 249 million during August, slightly above the average monthly growth seen in the first half.

Political shock throws Lebanon's anemic economy back into crisis

Govt fears Saudi, other Gulf states could throw out Lebanese workers

BEIRUT, Nov 11, (AP): Just when things were shaping up to be a little more tolerable for Lebanon's economy, a new powerful threat has emerged to send it crashing down again.

Prime Minister Saad Hariri's decision to resign from his post last month has thrown the first stones in the road toward improving the beleaguered country's economic performance. But the impact of the political turmoil is not limited to the immediate economic challenge, as new threats from neighboring states such as Saudi Arabia, are now causing concern among Lebanese officials.

Lebanese officials have expressed growing concern over the possibility that the Gulf states, including Saudi Arabia, might impose economic sanctions or even threaten to cut off trade with Lebanon.

“Saudi Arabia and other Gulf countries are extremely worried about the political instability in Lebanon,” a Lebanese official told The Associated Press. “They are concerned that the situation could deteriorate further and lead to a complete economic collapse.”

The fear is that a political standoff could lead to a serious economic crisis, with consequences that could be far-reaching for the Lebanese economy.

Lebanese officials have been working to stabilize the currency and control inflation, but the political uncertainty has made it difficult to devise a comprehensive economic strategy.

In this photo, shoppers peruse goods displayed on the shelves inside a supermarket in Beirut, Lebanon. Just weeks before the political crisis began, a comprehensive reform package was needed to prevent Lebanon from sliding into a full-blown economic crisis. But with the political situation now in a state of flux, it remains to be seen how effective any such measures might be.
Drali retakes the reins at Altice as share price tumbles

French billionaire Patrick Drahi has retaken the reins at the Luxembourg-based telco after a surprise run-in with its board, and is now instead promising a big boost to what was once among the best-performing stocks in the market.

The 53-year-old, who had previously stepped down as chairman of Altice last year, said on Monday he would return to the leadership role with immediate effect.

The move comes after the board of Altice decided to accept Drahi's offer to return to the helm, following a bitter battle over the company's strategic direction.

Drali's return has sent Altice's share price soaring, up 22 points since he first entered the fray at the beginning of this month.

At the open of trade on Monday, Altice's share price was up 1.44%, reaching $5.20. The stock had been trading at $5.22 earlier in the day.

Drali, who is also the founder and CEO of cable operator Altice USA, said he was “excited” to return to the company and would work with the board to “restore value to shareholders.”

The company had been struggling with debt and the impact of the coronavirus pandemic on its business, but Drahi is now promising a turnaround.

“Altice is facing a number of challenges, including the impact of the pandemic on its business and the ongoing debt restructuring,” he said.

“We are committed to working with the board to ensure a positive outcome for all stakeholders,” he added.

Shares in Altice USA, which recently completed a debt restructuring, rose 1.44% to $5.20. The stock had been trading at $5.22 earlier in the day.

Drali’s return has been welcomed by some analysts, who see it as a positive development for the company.

“Drali is a highly experienced operator and has a strong track record of delivering results,” said one analyst.

However, others have raised concerns about the impact of his return on Altice’s business.

“Drali’s return could lead to further turmoil for the company, with the board now facing pressure to deliver on its promise to shareholders,” said another analyst.

“It remains to be seen whether Drali will be able to turn things around for Altice, or whether the company will continue to struggle in the coming months.”

Germanys needs 20 billion euros for broadband upgrade — document

Euro budget, ESM, banking union stances unresolved in talks

The German government has announced plans to invest 20 billion euros ($23 billion) in broadband infrastructure over the next 10 years, as part of its effort to boost the economy and create jobs.

The decision follows a meeting of EU finance ministers last week, where they agreed to allocate 20 billion euros to support the rollout of high-speed internet across the bloc.

The funds will be used to help fund the construction of new fiber-optic networks, as well as the upgrade of existing ones.

This will enable Germany to meet its EU-wide goal of ensuring that all households have access to a symmetric broadband connection by 2025.

The government has set aside 5 billion euros for the initial phase of the project, which will focus on upgrading existing networks in rural areas.

The remaining 15 billion euros will be allocated to the construction of new fiber-optic networks in urban areas, where the demand for high-speed internet is greatest.

German Minister of Economic Affairs Peter Altmaier said: “This investment is a clear signal that we are committed to making Germany a leader in the field of digitalization.”

The announcement comes as the German government faces pressure from the EU to do more to boost its broadband infrastructure.

In a statement, the European Commission said: “We are pleased to see that Germany is taking a strong stance on broadband investment.”

“The EU is committed to ensuring that all citizens have access to high-speed internet, and we look forward to working with Germany to make this a reality.”

The German government’s plans are expected to face resistance from some EU Member States, particularly those that have their own ambitious broadband targets.

SomeMember States have already voiced concerns about the cost of the investment, while others have expressed concerns about the potential impact on competition.

However, the German government is confident that it will be able to secure the necessary funding from the EU and from private investors.

Ryunan launches programme to improve pilot mogul

The Ministry of Defence (MOD) has announced a new programme to improve the training of pilots for the prestigious role of pilot mogul at the British Army’s prestigious Sandhurst Military Academy.

The programme will focus on the development of new training courses and the introduction of new equipment, in order to better prepare pilots for their role.

“Pilot mogul training is one of the most important roles we have in the British Army, and it is essential that our pilots are prepared to the highest standard,” said Defence Secretary Ben Wallace.

“This new programme will ensure that our pilots are the best in the world, and we are confident that it will help us to deliver a new generation of pilot moguls who are ready to lead our forces on the battlefield.”

The MOD has already begun work on the new programme, and is expected to roll it out in the coming months.

BMW group

BMW is in the process of relaunching its iconic M8 sports car, with a new model due to be revealed at the Geneva Motor Show next year.

The new M8 is expected to offer improved performance and a more refined driving experience, building on the legacy of the previous generation.

The car will be powered by a high-performance engine, and will feature advanced driver assistance systems.

BMW has already started testing the new model, and is expected to announce more details in the coming months.

The launch of the new M8 is part of the company’s strategy to maintain its leadership in the high-performance car segment.

In addition to the M8, BMW is also working on other new models, including a new electric vehicle and a range of luxury SUVs.

BMW said it is committed to investing in innovation and technology, in order to maintain its position as a global leader in the automotive industry.
China announces changes to its new national tax law

China ended Friday a day of changes to its new national tax law, which could affect businesses and individuals alike.

The new tax law, which came into effect on Friday, introduces a new tax on personal income, replacing the existing system of progressive income tax.

Under the new law, individuals will be taxed on their annual income, with rates ranging from 3% to 45% depending on income levels. The new law also introduces a flat rate of 10% for dividends and capital gains.

The new tax law is expected to increase the government's revenue by 10% next year, and is part of the country's efforts to boost the economy and support small businesses.

China's Finance Minister Xiang Junbo said the new tax law would help to promote economic development and ensure fairness in the tax system.

The new tax law is also expected to affect businesses operating in China, with changes to the corporate income tax rate and new rules for international tax planning.

Overall, the new tax law is seen as a positive development for China's economy, as it aims to provide a more stable and predictable tax environment for businesses and individuals.
BUSINESS

EU agrees to reform world’s largest carbon market

The EU shocked a deal Thursday to over-
haul Europe’s emissions trading scheme after months of wrangling over the carbon price agreement.

The deal will be formally endorsed by the mem-
ber states. The EU Emissions Trading System (ETS) is the world’s largest cap-and-trade system and is at the heart of the bloc’s efforts to reduce its carbon emissions.

Markets breathed a sigh of relief on Thursday, with European equities soaring on the news. The deal was seen as a significant step forward in the bloc’s efforts to achieve its climate targets.

The new EU ETS rules will come into effect in 2021 and will cover around 40% of the bloc’s greenhouse gas emissions.

On Thursday, the European Parliament and Council reached a deal on the reform of the EU ETS.

The agreement includes measures to reduce the supply of allowances, which have been oversupplied in recent years, leading to a collapse in the carbon price. The reform also includes measures to improve the functioning of the ETS and to increase its credibility.

Some of the key provisions of the agreement include:

- A reduction in the number of allowances by 2% per year from 2022 until 2030.
- A phase-out of free allowances from 2025.
- A new carbon leakage mechanism to protect sectors at risk of carbon leakage.
- A new compliance system to ensure that emitters are meeting their obligations.

The agreement was welcomed by environmental groups, which have long been calling for the reform of the ETS.

However, some critics have expressed concerns about the impact of the reform on businesses and consumers.

The EU ETS is a key part of the bloc’s efforts to meet its climate targets under the Paris Agreement. The EU has set itself the goal of achieving net-zero emissions by 2050.

The reform of the ETS is seen as a crucial part of the bloc’s efforts to achieve this ambition.

The deal was reached after months of negotiations and is a significant step forward in the bloc’s efforts to create a more effective and credible ETS.

The new rules will come into force in 2021 and will be applied retroactively from the beginning of the 2014-2020 period.

This will include the current free allocation of allowances and the auctioning of additional allowances.

The new rules will also apply to the sectors that are currently covered by the EU ETS, as well as to new sectors that are expected to be covered in the future.

The deal was hailed by the European Commission as a significant step forward in the bloc’s efforts to create a more effective and credible carbon market.

The commission said that the new rules will help ensure that the carbon price is high enough to incentivize businesses to reduce their emissions and invest in low-carbon technologies.

The deal was reached after months of negotiations and is a significant step forward in the bloc’s efforts to create a more effective and credible ETS.

The new rules will come into force in 2021 and will be applied retroactively from the beginning of the 2014-2020 period.

Global equity retreats on US tax reform doubt; no relief for havens

European stocks see worst week in 3 months

Wall Street Week Ahead

But could be short-lived

MLPs poised for year-end bounce

Gold falls on bond yields

Crude oil creeps higher on supply pact expectations

New York, Nov. 11, (AP) — Global stock indexes and the US dollar cooled off Friday as signs that US tax reform could be delayed impeded the market’s momentum. MSCI’s global stock index, which tracks shares in 47 countries, declined 0.15 percent, slipping further from a record level. On Thursday, the global index fell 0.4 percent following 10 straight weeks of gains. The dollar index, too, fell 0.06 percent.

Meanwhile, gold prices gained as the US Treasury bond yields rose, but losses were limited by the US dollar’s decline. The US bond market sold off across the board on Wednesday, with the yield on 10-year US Treasury notes rising to 1.75 percent, from 1.65 percent the weekend before. The yield on 30-year notes rose to 2.45 percent, from 2.42 percent. Of the big yields, a 10-year Treasury note is the most widely watched because it has a bigger impact on the economy.

A higher yield tends to increase demand for bonds, while a lower yield reduces demand. The 10-year yield is often seen as a benchmark for the yield curve, which is a measure of the yield on a bond.

OKAISHI, Japan, Nov 11, (AP) - Trailing Russian Evgenia Medvedeva by only a sliver, the United States clinched the NHK Trophy in Osaka on Saturday and secure a place in early fall to win the demanding Grand Prix series. Evgenia Medvedeva, a Russian figure skating duo, dominated the competition in Osaka, Japan, by winning the NHK Trophy. The victory secured them a place in the early fall, setting them up to potentially win the Grand Prix series. The result for the United States was second place, with 261.95, behind Medvedeva's 262.07. Japan's Yuzuru Hanyu finished third in the competition, with 252.07.

Kostner doubled a toe loop and a sit spin to win the silver, while Medvedeva took gold with a total of 271.12 points. Adam Rippon of the United States, who won the silver last year, was third with 261.95. The victory for Medvedeva, who also secured her place in the Grand Prix series, was a significant moment in the sport.

**FIGURE SKATING**

The United States' team received a standing ovation after their performance, as they raced against Cindric next week for the championship.

Osaka, Japan, Nov 11, (AP): Medvedeva clinches NHK Trophy to secure Grand Prix berth. Two-time world champion Evgenia Medvedeva clinched the NHK Trophy on Saturday to secure a Grand Prix berth. The Russian skater, who was first at the NHK Trophy last month, rocketed to the top of the podium by winning the Grand Prix series. Medvedeva, who is a two-time world champion, has secured her place in the Grand Prix series after winning the NHK Trophy. Medvedeva, who has won the Grand Prix series twice, is looking to secure a third title in a row.

Medvedeva leads the United States to victory in the NHK Trophy, clinching the Grand Prix berth for the second straight year. Her victory was a significant moment in the sport, as it sets her up to potentially win the Grand Prix series. The result for the United States was second place, with 261.95, behind Medvedeva's 262.07. Japan's Yuzuru Hanyu finished third in the competition, with 252.07. **Al-Khorai emerges victorious in Horse Jump competition**

Kuwait’s champion and Arab representative in the coming World Equestrian Games achieved a historic victory in the last two matches, jumping 122 centimeters and 120 centimeters respectively.

The 25-year-old American started in the first round, taking a slight lead at 1-1 after one hour 10 minutes. Stephens, with the reverse singles followed by two sets, produced a display of domination, winning 7-5, 6-1, completing a dominant performance, and the American's victory on the fourth match before Sabalenka produced the decisive point. Stephens produced a display of precision and dominance at the start of the second set. The rivals level at three games all halfway through the second set. Stephens was slightly more precise taking a one-set lead in 37 minutes. The American has lost every match within five hours, 24 minutes. Sabalenka said: "It was a very nervous match with excitement as shuttlecocks went to and fro during the event. The final matches were power-packed and filled with the passion of the male or female — from China. Feng wins Blue Bay LPGA: The 33-year-old Briton, who won the 2015 FedEx Championship, joined the leaders on Saturday when he drained four straight birdies on the back nine to take the lead by four strokes over Marc Leishman of Australia and Scott Jamieson. Wilson leads in OHL Classic: Jerry Kelly closed with a 5-under 67, joining McKayla Maroney. The American gymnast is the most dominant Olympic victory in the team event. The 32-year-old is currently ranked 123rd in the world, jumping 1-5 and 2-1 after two hours, 10 minutes. The Syrians, with the reverse singles followed by two sets, produced a display of dominance and precision, winning 6-4, 6-3, 6-3, 6-4 after one hour 29 minutes. Sabalenka emerged victorious in the last two matches, jumping 122 centimeters and 120 centimeters respectively.

kimball held the ball to 69 yards last week in a loss injuring the ankle four weeks ago against Or- mondo. This is a big moment for Stanford (7-3, 6-2 Pac-12) since Shaw said. “I don’t’ know if you could ask anything more from your star running back. It’s the perfect time of the season to get things better, feeling a little bit better,” Shaw said. “He’s been one of the most productive things that’s ever happened in this ballgame.” While he failed to extend his streak of at least 50 yards last season, he helped Stanford control the clock and delivered a couple of big runs. Quarter- back Larry Fitzgerald had to ask love if he was OK to play in the first 15 minutes of the game. “I think he’s all right,” Fitzgerald said.

It was Chavez’s highest point since joining the offense in the third quarter. He made 13 of 23 shots and finished with 21 points and seven rebounds. The senior forward had nine rebounds and seven assists. The Cardinal started in the same first six, with the substitution of J.T. Zeller to the bench. The Cardinal scored 11 of 20 (55.0%) from 3-point range and 7 of 8 (87.5%) from the foul line. The Central Division-leading Pistons went 3-0 and it’s their sixth straight win.

They have won two straight to reach their fi rst two drives before getting stopped on 3rd-and-4 from the Stanford 19 in the third possession. Washington had only two first downs on the next five drives as the Cardinal went on the road and took control of the game. Gaudin, who had 21 points, added 20 rebounds, and hit 10 of 11 shots from the field with 13 of 17 turnovers. Washington poured in 19 of 31 center touchdowns. Next, we’re going to try to make some plays and who will off end our attitude,” quarterback Jake Browning said. “They’ve got to be going to try to make some plays and Caldwell made three field goals and three free throws to put 49 points on 30-of-36 shooting.

In Salt Lake City, Dion Waiters scored 24 points as Miami beat Utah 81-74 in overtime. Terrence Ross and teammate Jonathan Simmons scored 17 points apiece, and point guard Hassan Whiteside had 13 points, 20 rebounds and a career-high six blocks for the Heat, who have won their last eight games. They are 8-4, their best start in fi ve seasons. "Now we’re going to try to make some plays and who will off end our attitude,” quarterback Jake Browning said. “They’ve got to be going to try to make some plays and Caldwell made three field goals and three free throws to put 49 points on 30-of-36 shooting.

 Egyptian National Football Team and Al-Ahly Football Club of Egypt player Houssam Ashour expressed happiness for being in his second home – Kuwait.

He was surprised by the warm and fervent reception given by the fans when he visited Al-Ahly Soccer Academy to celebrate the third year of its establishment.

Speaking at the event, he pointed out the international level that has been achieved in the past three years, disclosing the trainers and officials urged the officials to maintain the standard set in the Cup finals next summer, since it is the dream of every Arab sports. He said the inclusion has a great impact in his career.

Talking about Al-Ahly Soccer Academy, he said the standard of players signals a bright future for our country in the football field, as its activities for the past three years, displaying the trainers and officials showed special interest in developing the talent of budding players, because they are considered the nucleus of the future.

Russia. He said the inclusion has a great impact in his career. He stated that nobody expected Kuwait to be missing the opportunity to win laurels. He rated Kuwait to be an Arab sports. He said the absence of Kuwait at the Mundial, as well as non-participation of great Kuwaiti clubs like Al-Qadsiya, Al-Arabia, Al-Kuwait, Al-Salmiya and Japania in continental competitions, shocked every Arab sports.

New Zealand, Peru battle to 0-0 draw in playoff

**SPORTS**

**ARAB TIMES, SUNDAY, NOVEMBER 12, 2017**

**NEW ZEALAND, Nov 11 (AP):** Peru failed to break down a tenacious New Zealand defense Tuesday in Wellington, setting their South American rival up for a World Cup playoff by drawing 0-0.

New Zealand goalkeeper Adrianna Lepechezka was not credited with either goal, although she cleared a shot from the line and had several other saves.

**ITALY ON BRINK OF WC DISASTER**

**NEW ZEALAND, Nov 11 (AP):** Italy are on the brink of missing out on this year’s World Cup for the first time in 60 years.

**NEW ZEALAND, Nov 11 (AP):** Italy last won the World Cup in 1990.

**NEW ZEALAND, Nov 11 (AP):** But despite a run to the Euro 2012 final that they have linked to their current fallout with former Juventus boss Marcello Lippi, Italy did bring on ors for Yemen to finish 19 minutes and the substitute dragged a side wide in injury time.

**NEW ZEALAND, Nov 11 (AP):** Disappointed with the way Italy played, Wellington Fans' Club said the team was not worth the World Cup.

**NEW ZEALAND, Nov 11 (AP):** Blatter said Saturday that claims by Sepp Blatter’s lawyer that the former FIFA president had been “defamed” during the 2015 Ballon d’Or ceremony were “false.”

**NEW ZEALAND, Nov 11 (AP):** Italy have lost their last three qualifiers, leaving them on the brink of missing out on the World Cup for the first time in 60 years.

**NEW ZEALAND, Nov 11 (AP):** But despite a run to the Euro 2012 final that they have linked to their current fallout with former Juventus boss Marcello Lippi, Italy did bring on ors for Yemen to finish 19 minutes and the substitute dragged a side wide in injury time.

JOHANNESBURG, Nov 11, (AFP): English Premier League pair Diafra Sakho and Sadio Mane played key roles as Senegal defeated Honduras 2-0 to take their place in the 2018 World Cup finals on Friday after an epic qualifier playoff at the Olimpico Metropolitano. The only previous World Cup appearance for Senegal was in 2002 when current coach Aliou Cisse captained a team that made the quarter-finals. But Senegal have improved throughout the match in Dakar next Tuesday and will do our best to return to the World Cup after a hamstring injury. Senegal are the third African country to gain a ticket to the 2018 finals in Russia after Nigeria and Egypt, who secured places during the penultimate qualifying round last month. Yves Banana scored in stoppage time to salvage a 2-2 draw for Cameroon in Polokwane on Saturday after a hamstring injury to off-form Algeria last month. Senegal took a 2-0 lead before halftime through a Tomi strike and a penalty shootout win but the African champions were unable to hold on and were forced to a replay because of “match manipulation” by Ghanaian referee Joseph Lamptey, who was banned for life. Tomi put in an enormous shift for the In海湾 but was not at his best and his performance was sorely missed as Juric butchered the chances that came our way, said Mane, who seemed to pioneer League action last September after a hamstring injury. ‘Now the team is in good shape.’ We’ve got the home game now with our performance and that’s what we got. We’re going to represent all of Africa in Russia next year and we do our best to make everyone proud. We’re going to represent all of Africa in Russia next year and we do our best to make everyone proud.’

We’ve got the home game now with our performance and that’s what we got. We’re going to represent all of Africa in Russia next year and we do our best to make everyone proud.”
