Al-Assairi receives winners of 5th Arab Robotics Congress

Kuwait University President Dr. Taha Hamza Mohamed Al-Mubarak announced during the award ceremony at his highness the Amir’s palace, the winners of the 5th Arab Robotics Congress. The congress was held at the Kuwait University, College of Engineering and Petroleum and organized by the Robotics and Automation Research Group (RARG) of the college.

Al-Assairi commended the participation of the Arab universities and said the congress aims to encourage the young researchers in robotics in Arab universities. He also said the congress is an initiative held by the Kuwait University to encourage research and development in robotics in the Arab region.

KUWAIT CITY, Oct 21: Dr. Abduh Al-Saleem, the Arab University of Science and Technology’s rector, received the Best Poster award for his poster ‘Modeling robot’s movements for the gazelle in the Marathon course’. Al-Saleem said the congress is an opportunity for researchers to meet and learn from each other.

Al-Assairi also commended the participation of the Arab universities and said the congress aims to encourage the young researchers in robotics in Arab universities. He also said the congress is an initiative held by the Kuwait University to encourage research and development in robotics in the Arab region.

KUWAIT CITY, Oct 25: Dr. Al-Mutawa, a student of the Arab University of Science and Technology, won second place in the category for distinguished contributions to the field of robotics. Al-Mutawa is a Kuwaiti student who won a scholarship to study in the United States.

For his part, Dr. Abdullah Al-Sabah, a professor at the Arab University of Science and Technology, said the congress is an opportunity for researchers to meet and learn from each other. He also said the congress is an initiative held by the Kuwait University to encourage research and development in robotics in the Arab region.
