American troops leaving Syria cannot stay in Iraq

Opinion

By Ahmad Al-Jarallah

US lawmakers set up to impose sanctions on Turkey if it does not end its offensive in northeastern Syria, and a leading Kurdish politician called on President Donald Trump to stop the “ethnic cleansing” of her people.

"We need to stop the slaughter. We need to know that we don’t need rule by [the] Islamic State military,” Demos-

c t rate and the Democratic Party in the US fully supports the Kurds’ efforts to maintain the status quo in the region, which includes the protection of civilians, the safe return of displaced people, and the International Criminal Court (ICC) to prosecute those responsible for crimes.

The US military convoy arrives near Duhok, Iraq on Oct 23. Defense Secretary Mark Esper said Monday that after the current US-led operation against ISIS, the military will continue to stay in the country, Iraq's military said on Tuesday as American forces continued to exit the chain of agreement in Syria.

WASHINGTON, Oct 22, 2018 - (Reuters) - US lawmakers ke-

p up their push on Monday to impose sanctions on Turkey if it does not end its offen-

sive in northeastern Syria, and a leading Kur-

dish politician called on President Donald Trump to stop the “ethnic cleansing” of her people.

"We need to stop the slaughter. We need to know that we don’t need rule by [the] Islamic State military,” Demo-

crista Christina Van Hollen told a news conference.

Lawmakers said they were working to sign more correspondence to Congress on the situation in Syria.

"We understand that the US military has continued to conduct operations against the Islamic State group to prevent its resurgence. (AP)

"We are concerned about the possibility of renewed fighting in Syria,” Van Hollen said, adding that US forces would stay on the ground until the situation is stabilized.

"We need to stop the slaughter. We need to know that we don’t need rule by [the] Islamic State military,” Democratic lawmaker Richard Blumen-

Kuwait signs $85.7 million loan for Sina project

Kuwait’s Arab Investment and Development Company (KFAED) signed on Monday a $85.7 million loan project with the State of Egypt within a framework of bilateral cooperation. The loan will be utilised for financing the Sina project, which is part of the Egyptian National Development Plan 2032. The agreement was signed on the sidelines of His Highness the Prime Minister Sheikh Sabah Al-Salem Al-Hamad Al-Sabah’s visit to Cairo, where he met with the Egyptian President. The Arab Fund for Social and Economic Development, the Sama Di Fund for Development and the Egyptian National Development Plan are contributing along with the KFAED to the Sinai Peninsula Development Program.

Kuwait receives 11 reports on corruption complaints

Kuwaiti government received 11 reports on corruption cases within the framework of the ‘Corruption Prevention and Fight’ programme. Officials at the Public Prosecution and the Prime Minister’s Office have referred the cases to the State Audit Institution to handle.

Kuwait City (KUNA): Kuwaiti government received 11 reports on corruption cases within the framework of the ‘Corruption Prevention and Fight’ programme. Officials at the Public Prosecution and the Prime Minister’s Office have referred the cases to the State Audit Institution to handle.

The reports were made by Kuwaiti diplomatic attaché Rehail Al-Fahhan during the UN General Assembly’s joint committee’s discussion on the report by the UN Commission on International Trade Law. Kuwait is set to exert vital efforts to form the country into an economic and financial centre. It is expected it would become the same as made by former convicts who had been sentenced for corruption, he noted. Meanwhile, the daily has learned that three former deputies convicted of storming the National Assembly’s door in 2015 continue to stay in hospital. He confirmed it was true that upcoming elections will witness the participation of those who had been involved in the storm. International Neurocritical Care Society honors Kuwaiti physician

KOC deputy CEO receives award

KOC Executive Vice President and Deputy CEO Ali Shehab, the KOTC Deputy fleet that operates with top notch technology, said the company earned the award since 2015 by implementing strict safety standards. The KOC is operated by well trained and skilled national cadres.

One of the society’s main objectives is determining opportunities to assess and enhance knowledge and skills in the neuroscience ICU to improve patient outcomes.

NCS strives to discern clinical practices, and challenges for neurocritical care patients around the world, the Kuwaiti physician said.

The award recognizes an individual who exemplifies outstanding leadership in banking and finance, and who has displayed a proven commitment to professional cooperation between the US and the Middle East and North Africa.

NCS honors Dr Yasser Abulhasan with the 2019 Presidential Citation award.

ABANA Award

NEW YORK, Oct 22, (KUNA): The Neurocritical Care Society was represented by Dr Yasser Abulhasan, Kuwait's Deputy General Manager of Kuwait Oil Tankers Company (KOTC), who received the prestigious ABANA award, making him the first physician from the MENA region to acquire such a prestigious prize.

Abulhasan, an assistant professor of Anesthesiology at Kuwait University, as well as Anesthesiology and Critical Care consultant at Ibn Sina Hospital, was honored alongside other 30 health care physicians during the ABANA awarding ceremony, held in Vancouver, Canada. The "Presidential Citation" awards recognize NCS members who made remarkable contributions in any area of the Society's mission.

The paper was presented at the ECOSAI symposium raised the sub-health-care professionals, comprising of physicians, pharmacists, nurses, and advance life support providers who treat a wide range of neurocritical conditions.

umeric professional cooperation between the US and the Middle East and North Africa.

Bastaki receives prestigious ABANA Award Achievement Award

NEW YORK, Oct 22, (KUNA): Farouk Bastaki, the Managing Director of Koceifa, was honored along with Mahmoud Mmdani and David Roubensiten, in the ABANA award ceremony.

KOC deputy CEO Ali Shehab received a recognition for the company's commitment to enhancing diversity and inclusion, as well as its efforts to support emerging leaders from underrepresented communities.

KOTC awarded as top oil tankers’ operator in Mideast

KUCF: Colloquium on Ubiquity of QR Code System

KUWAIT CITY, Oct 22, (KUNA): Kuwait University administration, in cooperation with one of the college’s departments organized QR code system for registering the attendance of students in scientific lectures, reports Al-Ghabai daily.

The university administration registers the lectures, ensuring that it is visible and that there is no failure to include the lectures. However, the system also allows for easy identification and verification, and it identifies the student's location. If a student does not bring his or her phone, he or she is recorded as absent even though he or she attended the lecture.

The paper presented at the session aimed to understand the systems in general, and the college responded to the request and emphasized the role of the systems administration in its contribution to various scientific departments of the college in improving the identification of the systems.

Al-Khazzar inaugurates confab grouping reps of local charities under ‘rigorous’ govt control

Kuwaiti charities under ‘rigorous’ govt control

By Ahmed Al-Naqeeb

Arab Times, WEDNESDAY, OCTOBER 23, 2019

Kuwait TV following the inauguration of a conference in collaboration with the Brazilian Embassy in Kuwait, an exhibition is being displayed until Oct. 28 at the Yarmouk Cultural Centre. Exhibition is open 8-10 am.

Kuwait’s wealth reaches $405 bn in mid-2019

Kuwait ranked third in the Gulf in terms of wealth, with Saudi Arabia topping the list with a total wealth of $1.11 trillion, followed by Bahrain with an average of $53.9 trillion and the UAE with $390 billion. Qatar ranked fourth with an average of $106 billion.

Kuwait’s Ministry of Social Affairs (KMSA) Akbar Al-Khazzar said in a statement at inauguration of a conference grouping representatives of local charities and addressing charitable work in Kuwait and abroad. He emphasized that the government closely monitors all local charities to make sure they strictly adhere to national laws, citing a newly-proposed piece of legislation dealing with the matter.

On the aforementioned law, he said it would be a “nuisance” towards charity registration and operation, which in turn would help organize Kuwait’s philanthropic activities.

‘Reinvent Your Energy’ program held

Excellent Teaching Program affiliated to the Kuwait University, Assistant Undersecretary for Communications and Information Technology Eng. Ramad Al-Ashrafi as an advisor to the event on Monday.

In every session of the program ‘reinvent your energy’, three faculty members of the university usually talk about their experiences concerning usage and selection of effective teaching methods to improve interaction with students, in addition to the use of information technology in the classroom, and applying them in all aspects of teaching.

Chairman of the committee chairperson’s report to the Parliament’s Labor and Defense Committee discussed the governmental bill No. 22/2019 concerning the regulation of the Kuwait Fire Service Directorate (KFSD), which consists of 25 articles addressing various legislative gaps in this regard.

Chairman of the committee chairperson MP Asad Al-Enezi revealed that several concerned officials from KFSD attended the meeting and provided valuable inputs, adding that the committee will continue to write other concerned authenticities and independent bodies especially the firefighters’ labor union to ensure the bill brings about the best possible outcome.

He said the committee’s consultants were instructed to work with their firefighting counterparts and look into legislative formulation that would ensure the rights of all firefighters are upheld.

The committee also discussed the bill submitted by MP Akbar Al-Khazzar for the needs of the firefighting profession with the cooperation of Global specialized centers.

The government’s proposal also included a recommendation to found a college for firefighting studies based on a decree that specifies the conditions to join the college and the period of study.

The bill suggested establishing an integrated hospital for firefighters with all specializations and advanced laboratories within a period of five years. It suggested establishing a department in the hospital for conducting researches relevant to the firefighting profession with the cooperation of Global specialized centers.

The government’s proposal also included a recommendation to found a college for firefighting studies based on a decree that specifies the conditions to join the college and the period of study.

Kuwait has 63,000 millionaires; report

The report estimated there are 63,000 millionaires in Kuwait, while 100 Kuwaitis whose wealth is between $53.9 million and $52 million dollars; 21,000 Kuwaitis whose wealth is between $25 million and $24 million dollars.

Kuwaiti charities are really distinguished in their efforts, said a minister on Tuesday. The meeting was attended by Assistant Undersecretary for Communications and Information Technology Eng. Ramad Al-Ashrafi as an advisor to the event on Monday.

Mr. Al-Kharraz inaugurates confab grouping reps of local charities

Al-Azmi said the supposed reshuffles, which was held on the sidelines of the national day of an international judicial conference, failed, as both ministers agreed to share legislative expertise and step up training programs for judicial staff.

Speaking to KUNA, Al-Azmi revealed that the high level of the bill was the importance of the Parliament’s participation in the compliance enforced by the Moroccan city of Marrakech, commanding the experience of the expertise of both parties. He said the committee’s consultants were instructed to work with their firefighting counterparts and look into legislative formulation that would ensure the rights of all firefighters are upheld.

He emphasized that the government closely monitors all local charities to make sure they strictly adhere to national laws, citing a newly-proposed piece of legislation dealing with the matter.

GCC chiefs meet in Oman, set strategic urban ‘planning’ in Gulf region

The Organization of Arab Petroleum Exporting Countries (OAPEC) has issued its 44th annual report for 2018, focusing on overall Arab and global oil and gas energy developments and the impact of the latest energy scenarios on local and regional economic developments. The report covers the current and future outlook of oil and gas industry in OAPEC member states, with the current developments of world economy, energy and oil, the Arab oil body said in a release Thursday.

The global oil market saw market fluctuations in 2018, registering a meaningful deviation in the first quarter, in the light of an Organization of Petroleum Exporting Countries (OPEC) resolution to extend its output cut till 2019, along with a world economic recovery, OAPEC Secretary-General Al-Naqi said in a speech. The report, which took place early 2017, continued in the second quarter of 2018, which saw a revival of output deal about OPEC and non-OPEC member in the aftermath of growing worries about a shortage of global oil supplies, he said. In the third quarter of 2018, oil markets were relatively affected by increases in geopolitical tension and concerns over OPEC trade, Al-Naqi added.

The last quarter of 2018 witnessed more expectations about a slide in global oil demand and research from about a looming hike in international oil supplies, the OAPEC-based organisation’s report consists of two key parts: the first part handle international developments in the oil and energy domains, while the second part revolves around the conferences, symposiums and meetings organised or attended by the Arab oil body in 2018.

THE generation that witnessed the period of Arab unity, also called the Gulf Cooperation Council (GCC), in the late 1970s and 1980s, will not be able to compare the current situation of the GCC to someone who has experienced it, columnist Alaa Nasrawi wrote for Al-Fawz daily.

“OPEC nations have been busy since day one to change the status of their countries, which changed in a way that could be described as positive,” he stated.

The next step of the GCC now is to promote and encourage the private sector to work as a supporting force for the public sector, he added.

The report focuses on the need for the GCC to promote private sector development, saying that the private sector is a necessary component for the GCC and that it can help to reduce the burden on the public sector.

The report also highlights the importance of renewable energy sources, particularly solar and wind energy, as a means to diversify the GCC’s energy mix and reduce its dependence on oil.

The report also examines the GCC’s role in the global energy landscape, particularly in the context of the Paris Agreement on climate change. It notes that the GCC countries have made progress in reducing their carbon emissions, but more needs to be done to meet their climate goals.

The report concludes by calling for greater coordination and cooperation among GCC countries to address the challenges facing the region’s energy sector.
'Lebanon darkness coming to us'

By Al-Sabaan

I have known Lebanon for 66 continuous years—ever since I was born and have returned every year since the country's creation in 1943. I have known Lebanon through its first, second and third constitutions, and sometimes it is difficult for me to write about Lebanon, even in peaceful times, its involvement in mass conflicts and bloody and brutal and deadly conflicts with each other.

Today, I feel that the condition of Lebanon is similar to the condition of a child. They manage to escape.

If we go back to the situation in Lebanon, the Lebanese and the Lebanese abroad are placed on prison inmates only if they are not part of the government, and they face punishment in their own country. Lebanon has been in a state of war and civil wars, its government has been unstable and almost nonexistent. We have not seen Lebanon in this condition since the 1970s. We add to this the delays and losses that occur during this war, and countless numbers of people are killed and wounded. It is clear that Lebanon is in a situation we have not seen before.

What happens in Lebanon can happen in Kuwait, and I do not say it with fear and concern. A while ago, the people of Kuwait were elected, and we are all here. We say that we are not in a war, and we are not in a war, and we are not in a war...

In 1970, there was a war between the Arab countries, and people were killed and wounded and fighters and fighters and fighters and fighters...

People of Lebanon, if you are not part of the state and do not support your country, you should think that the situation of Lebanon is similar to the situation of Kuwait. Kuwait, which is a rich country, has not been in a war for decades, and the Lebanese are in a war. Kuwait is a country that is rich and has a lot of money, but the Lebanese have not seen such a war in their country, which is the world's war.

I believe that Lebanon is experiencing the same condition as it is experiencing, and the situation in Lebanon is similar to the situation in Kuwait, and we should think about it.

The situation of Lebanon is a war, and we should think about it. We cannot say that we are not in a war, we are not in a war, we are not in a war, we are not in a war...

For the first time, the people of all areas left their homes to participate in the revolution. The rest of the population, and also the trabalho, have closed their phones.

Yes, since 1960, Lebanon has not been in a war, and this is assemblage as that of the political state, and it is a war.

For me, Lebanon darkness coming to us. Lebanon darkness coming to us.
PM Trudeau wins second term but loses ‘majority’

The Liberals topped the 338-seat mark in Monday’s vote, according to Elections Canada. That put the Liberals far short of the 176 seats they needed for an open-ended majority government.

Trudeau, 49, whose party won 122 seats, Sunday, whose party won 122 seats, said he was “absolutely thrilled” to win a second term.

“I believe the way we went about it was the right way,” he said.

The Liberals won big in British Columbia, but they lost ground in Alberta and Saskatchewan, where the NDP came in third.

Trudeau said he would continue the government’s work on climate change, and said he would work with provinces and territories to ensure that the country’s transition to a low-carbon economy is successful.

He also promised to work with provinces and territories to ensure that the country’s transition to a low-carbon economy is successful.

Britain

'Let's get Brexit done'
Brexit in balance as UK PM faces 'crunch' votes

London (AP) - British Prime Minister Boris Johnson faces a crucial test on Monday as MPs are set to vote on a deal that would enable Britain to avoid crashing out of the bloc without a divorce agreement. The vote is expected to be fiercely contested, with Johnson's Conservative Party and its Brexit allies facing resistance from Remain-leaning MPs and the opposition Labour Party.

Johnson is struggling to win over MPs who have been divided over Brexit in recent weeks. He has faced criticism for his handling of the crisis and his attempts to secure a deal with European Union leaders. The next steps will depend on the outcome of the vote, with Johnson vowing to push for a deal if passed and to call for a new election if it is rejected.

The vote will take place early on Monday, and MPs will have until then to consider the deal and its implications. Theresult will be crucial for Johnson's future as leader and for the Brexit process.

Spain

Spain split for further political stalemate: poll

Madrid (AP) - Spain is facing another political stalemate with a general election looming on the horizon. A recent poll indicates that the Socialists and their allies are set to win a majority in the upcoming election, but they will struggle to form a government.

The poll shows that the Socialists would win 123 seats, followed by the far-right Vox with 61 seats, the far-left Podemos with 51 seats, and the conservative People’s Party with 41 seats. However, no single party has a clear majority, and forming a government will be challenging.

The Socialist Party of Pedro Sanchez, who faces a repeat parliamentary election, has come under pressure after judges gave long prison terms to leaders of a separatist movement in the wealthy northeastern region. The poll was published the week before that vote.

The atmosphere has calmed down considerably since the conservative government was ousted in late September, a woman died in a fire in an overcrowded camp in Samos island to the port of Elefsina as authorities have been moving hundreds of migrants and refugees to camps.

Britain

An armed man stole an ambulance in Oslo on Monday, targeting five people including two babies who were driven off and left in a family home. Norway police and hospital officials told Reuters. The driver was arrested after a chase.

The incident is the latest in a series of attacks in Norway, where police and security forces have been on high alert following a deadly shooting at a summer camp.

Greece moves more migrants: Greek authorities moved more migrants from the overcrowded Samos camp to camps on the mainland. (AP)

Europe

Refugees and migrants wait for buses after their arrival to the port of Elefsina, Greece on Oct. 23, 2019. The European Union parliament, the bloc's other members would never take a decision that forces Britain out with no deal. The so-called WAB (Withdrawal Agreement Bill) would have taken 10 to 40 days to get through parliament.

Debate

The so-called WAB (Withdrawal Agreement Bill) will face its final test in parliament on Monday. MPs are set to vote on a deal that would enable Britain to avoid crashing out of the bloc without a divorce agreement. The vote is expected to be fiercely contested, with Johnson's Conservative Party and its Brexit allies facing resistance from Remain-leaning MPs and the opposition Labour Party.

The opposition Labour Party will vote against both WAB and the Brexit bill, its leader said. The party has called for a general election, but Johnson has insisted that the UK will leave the EU on Oct. 31, regardless of the outcome of the vote.

The atmosphere has calmed down since the conservative government was ousted in late September, a woman died in a fire in an overcrowded camp in Samos island to the port of Elefsina as authorities have been moving hundreds of migrants and refugees to camps.

Barcelona, Oct. 22, Catalonia's regional government leaders called on Madrid on Monday to rescue its policies in Catalonia, the region in Spain with a high count of asylum seekers. "We say no and we warn that continuing in this direction is a threat to the stability of everyone," Catalonia's president Carles Puigdemont said in a statement.

The wealthy northeastern region was rocked by a vote in favor of independence, leading to a political impasse and a standstill in the negotiations. The government, led by Prime Minister Pedro Sanchez, has vowed to fight the independence drive with non-violent means.

Sanchez's minority has been weakened by the independentist vote and the Socialists' decision to support the independence movement. The Socialists have said they will negotiate with the parties that support independence to form a government.

The poll was published the week before that vote. Projections showed Sanchez would win with 30 seats, enough to form an alliance with the main opposition party, the Popular Party, and potentially with minor parties.

**Ungrateful, ambitious**: palace

Thailand strips her consort of her titles and military ranks for being "disloyal, a two-page document on its website.

As recently as last week, Sineenat was featured in magazines and was dyed a two-page orange robe as they brushed over her, doing everything to let the palace know of her disloyalty. She is also not receiving medical treatment despite a recent blood test.

Sineenat is ungrateful and being put into preparations, the ceremony will be attended by about 400 foreign dignitaries and representatives from Japan's administrative, legislative and judicial branches and their spouses. A parade originally planned for Tuesday was cancelled due to the anniversary of the 1932 coup.

**Nobel laureate campaigns against the “killer robots”**

**UNITED NATIONS, Oct 22, (AP):** Nobel Peace laureate Jody Williams is backing a campaign for a new international treaty to ban lethal autonomous weapons (LAWs).

Williams started the 1997 Nobel Peace Prize for her work in landmine-free zones. She said much of the world’s media, including the United Nations Assembly, has “woken up” and is backing a treaty to stop LAWs.

The American peace activist said the Campaign to Stop Killer Robots has “very very few”, backers in the United States. Williams said that races on technology and competition for weapons have gone too far.

“I think our challenge is to stop international arms races that have led to weapons so advanced that you have to think about the unintended consequences of them, so I think we have to get a better world, a better future,” she said.

Williams said that in the current political climate it is impossible to complete a treaty.

“Machines should be in the service of human life, not against human life,” she said.

**WASHINGTON, Oct 22, (Agencies):** Climate change is making stronger El Nino, the world’s biggest weather swing, more frequent and intense, scientists said, as a new study found.

Scientists concluded 15 El Nino, natural warming of eastern Pacific Ocean that triggers extremes across the Americas, was stronger in 1976, 1982, 1997, 2015 and 2019, and that El Nino has been ‘inching’ for years in terms of intensity, leading to stronger El Ninos in some cases.

A powerful El Nino, can trigger storms in some places, like Australia and Japan, and severe flooding in other areas, like California and India. And it can cause flooding in the Pacific Northwest, Midwest and the Atlantic Ocean.

The American National Oceanic and Atmospheric Administration (NOAA) said the El Nino has been “inching” for years in terms of intensity, leading to stronger El Ninos in some cases.

“We’re calling for diplomacy to speed up.”

The move, broadcast live on major Danish news outlets, depended on the weather, which was currently fair in the area.

The lighthouse ceased operating in 1968 and the buildings adjacent to the lighthouse. The Environment Minister has called the white, square lighthouse “a national treasure” to explain why ministry called to prevent it from falling into the sea.

The decision to step up pressure for a treaty, “so we don’t see machines, in theory through algorithms, decide what they will target and what they will fire, there are autonomous drones ... and also vehicles,” working on their own version of these weapons. “There are no humans deciding to fire, the autonomous drones ... and also robots,” she said.

She said “the committee operates by consensus method” to ensure that they would not result in a binding treaty, but a non-binding agreement.

**ARAB TIMES, WEDNESDAY, OCTOBER 23, 2019**

Bledel crowned most 'dangerous celebrity'

LOS ANGELES: Cyber-security firm McAfee on Monday crowned stars Bledel and Austin as its most dangerous celebrities of 2019, though the couple's status as a “dangerous couple” is likely one the tech firm is using to promote its services. McAfee urges internet users to stay away from websites that carry viruses or malware.

Bledel, 33, gained fame for her role as Rory Gilmore on the popular TV show “Gilmore Girls,” and “Sisterhood of the Traveling Pants.” But the actress’ rise to fame has come with its share of challenges.

In 2007, Bledel was named one of the 100 most dangerous celebrities by McAfee, a title she has held for the past 12 years. The company has made the ranking based on the number of websites that attempt to infect or trick users into clicking on ads for viruses and malware.

In addition to Bledel, McAfee also named actress Jessica Alba as the most dangerous celebrity of 2019. Alba’s website was found to be infected with a virus that can steal personal information.

The news comes as internet users are increasingly concerned about the security of their personal information. McAfee urges internet users to be cautious when clicking on ads and to avoid websites that appear suspicious.

The company also advises internet users to use strong, unique passwords and to avoid using the same password for multiple accounts. McAfee has launched a campaign to educate users about the risks of online threats.

Bledel has kept a relatively low profile of late, but Davis explained that rumors circulated this year that the actor wasometing after the death of her husband, who passed away in 2018. She previously created the Hulu series “The Handmaid’s Tale,” which received critical acclaim and was nominated for multiple Emmy awards.

A mother of three, Bledel is known for her roles in “Gilmore Girls,” “Sisterhood of the Traveling Pants,” and “The Selection.” She recently starred in the film “The Light of the Moon,” which received positive reviews.

Davis, who has been a vocal advocate for women’s rights, also noted that the rise of the #MeToo movement has made it more important than ever for women to speak out about their experiences.

The announcement comes as internet users are increasingly concerned about the security of their personal information. McAfee urges internet users to be cautious when clicking on ads and to avoid websites that appear suspicious.
Long lost father found, but quickly 'lost again'

Dear Abby:

I grew up not knowing who my biological father was. When I first learned his identity, I was 15. Since then, my father has cut off contact with me and my mother, and I have not heard from him in a long time.

Recently, my father reached out to me. He told me he misses me and wants to be in contact. He said he wants to talk about the situation. I am not sure what to do. I feel contradicted because I do not know if I should be happy or angry that he is reaching out.

What should I do?

Respectfully,

[Your Name]

Dear Abby:

I have a question about a family member who is struggling with addiction. They have been in and out of treatment and have tried different methods. However, their addiction persists. I am unsure how to help them and what steps I should take.

Can you provide advice on how to support someone with addiction?

Respectfully,

[Your Name]

KUWAIT CITY, Oct 22: National Bank of Kuwait (NBK) signed a partnership deal with ‘Entrepreneurs Organization Kuwait’ at the company’s main office in Kuwait City.

Talal Al Sultan – President at Entrepreneurs Organization Kuwait, said: “The initiative with KU is part of the company’s responsibility towards the youth of Kuwait whilst giving back to the community. Giving them the opportunity to integrate their local roots with the evolving technology and the highly tailored design facilitated by the_mentioned project, NBK is offering modest support from its solidarity banks and providing guidance from KFH, in order to help young people to keep abreast with the new trends in the field of hospitality services to transport the young generation capable of keeping up with the generation that follows them. "Brilliant Lab” is part of the bank’s social responsibility framework, and creates an accelerator for emerging technology ventures and startups, and for the first time since its establishment at the beginning of its journey, almost 15 years ago, we see a partnership deal with KU which focuses on an effective contribution to the development of the new generation. The bank offers support to the projects that have been developing technology ventures, in order to motivate the youth to work with such projects, and to develop the human capabilities in the local market. Our responsibility towards our own generation is enriching the youth of Kuwait by sharing our vast expertise with them, under the title of the National Bank of Kuwait’s “We Need You” campaign, which focuses on the human capital that receives training under several business divisions including Treasury, Finance and Accounting, Trade, Corporate Banking, Risk Management and Retail Banking. KFH’s partnership with “Brilliant Lab” offers a new platform to develop local talent and provides work opportunities for the youth, to take a new course in the private sector, to join different trade and investment firms, and to use technology as the key financing partner to the youth. NBK’s commitment to maintaining the balance between the economic and social aspects of the youth, is an expression of our social responsibility and our commitment, as the key financing partner to the youth, to develop the human capabilities in the local market.

The program primarily seeks to provide the youth with the skills needed to work in the sector and deal with the challenges they may face. It will focus on the field of hospitality services to transport the young generation capable of keeping up with the generation that follows them. "Brilliant Lab” is part of the bank’s social responsibility framework, and creates an accelerator for emerging technology ventures and startups, and for the first time since its establishment at the beginning of its journey, almost 15 years ago, we see a partnership deal with KU which focuses on an effective contribution to the development of the new generation. from nowhere, Yolo faded away. Just as it seemed to appear, investigators couldn't figure out what was happening.

Vape users have developed mysterious illness clusters attributed to illegal CBD vapes, including Black Magic and Black Diamond, which sickened nearly 100 people in North Carolina.

The illness was particularly concerning to health officials and researchers because the outbreak ended early, and no one understood where it came from.

"We're trying to figure out what was responsible for the illness," a former investigator told reporters.

A flue-like illness broke out in Utah that caught up with investigators. Dr. Sam Black, the former investigator, passed the tip to the US Drug Enforcement Administration.

hookahzz was among the companies that provided no contact information. The former book-keeper also provided no information.

"We don't know if concussion was the cause or whether it was heading or not," English Journal of Medicine on Monday.

The former book-keeper also provided no information. The former book-keeper also provided no information.

"In youth football, you might want to prove the viruses are causing disease," said Dr. John V. Williams, in a Boston University scientist who has written a commentary published in the journal. The findings in professional football led in England by the Football Association and the National Football Federation.

"If you don't have a cause, you can start like the sniffles but quickly get, able to be identified. EV-A71 – were causing widespread hospitalization, within days he developed some paralysis in his neck, shoulder and arm. Further work is underway to diagnose and identify this strain, which Williams said might be a powerful piece of circumstantial evidence.

"The list of entero-viruses. Add a specific germs only wind up in spinal fluid, leaving doubt about the link. EV-A71 – were causing widespread hospitalization, within days he developed some paralysis in his neck, shoulder and arm.

"We need to figure out what is going on and understand what it means, because that's all we've ever asked to do." English Journal of Medicine on Monday.

The bidding: South West North East
1 NT Pass 2 NT Pass

Opening lead — five of hearts.

Many netrophy contracts are like a race, with each side trying to be first to set up and run its long suit. However, the temptation to establish a long suit as quickly as possible must sometimes be resisted in the interest of safeguarding the contract.

Take this deal where West gets the defense on the right track by leading his longest suit, hearts against three no trump. Dammy’s jack held the first trick, and declarer immediately went after his own long suit clubs.

East won the first club with the ace and returned a heart, and South suddenly found himself on the wrong end of a losing proposition. The queen of hearts lost to the king, and a third heart drove out the ace.

 declarer ran his clubs but, with only eight tricks in view, had little choice other than to try a spade finesse for his ruff. But when West won the jack with the king and ruffed a third club, two good hearts, the contract was down one.

In attacking clubs first, South overlooked two major considerations: first, that the opposing hearts poised a direct threat to the contract and, second, that even after the clubs were established, he would still be one trick short of his contract.

For these reasons, South should have delayed playing clubs and instead taken the spade finesse or trick two. If the finesse won, he could then turn his attention to the club suit. Even if the spade fineses lost, as in the actual case, West could either have to return a heart into the A-Q or shift to a different suit, giving South time to establish the clubs.

Proper pacing, not speed, usually determines the outcome of bidding in no-trump contracts.

**OPEC, allies to Mull deeper cut**

In this photo, commission walks through a corridor in the World Trade Center Transportation Hub in New York. Women business owners can find that it hard to be taken seriously even among companies filled multimillion-dollar enterprises. That's the finding of a report released last week by Babson College and Bank of America that analyzed the challenges women encountered as they were building their companies. (AP)

US suffers biggest fall amid political uncertainty

Canada named top nation for social entrepreneurs

**BRD opposes Turkey naming Hakan Atilla as CEO of course**

ANKARA, Oct 22, (Reuters) - Turkey's Economy Minister and Development MinisterReuse this paragraph.

The government-opposition divide is widening in Turkey as the economy continues to slide, and the opposition is pressing for greater transparency in the country's fiscal policy. The opposition, including the main opposition Republican People's Party (CHP), has been calling for a new independent central bank and more openness in economic policymaking. The government, led by President Recep Tayyip Erdogan, has rejected these demands, saying that they would undermine the country's stability and economic growth. The government has also repeatedly said that it is committed to a market-oriented economy and is not interested in imposing fiscal discipline.

**ABU DHABI, Oct 22, (Reuters) - The United Arab Emirates (UAE) is preparing bids on bank lending to the United States, as the global oil market remains volatile and central banks adjust their monetary policies. The UAE is one of the world's largest oil exporters and has a strong financial sector. The country's central bank, the Abu Dhabi Central Bank, has been active in recent months to stabilize the local currency and support the economy.

**ANKARA, Oct. 22, (Reuters) - Turkey’s government will probably delay its policy announcements until the end of the year, according to a survey conducted by the Istanbul Chamber of Commerce (ICC).

The survey, which was conducted last week, found that the majority of businesses in Turkey expected the government to delay its policy announcements until the end of the year. The primary reason for this was the uncertainty surrounding the outcome of the recent elections in the country.
US companies are responding to the lowest management rate in almost 50 years by increasing automation in order to maintain healthy margins as labor costs rise higher and hiring is more difficult. An analysis of corporate earnings transcripts shows the attempt to save money through automation is coming down to just installing more robots in factories. Instead, companies are confronting the lack of low-cost workers by investing in software and machines that can perform tasks ranging from warehouse management to financial modeling.

It is expanding its cloud automation services to allow even small businesses to leverage new technologies. The goal is to cut costs and be more efficient, according to the Association for Advancing Automation.

"We don't need great engineering skills to do this anymore," said Brian Foley, who thinks Honda could automate a lot of its current footprint or even scraps its factories. "We don't need great engineering skills to do this anymore. These technologies are increasingly ready to trade in and move up - do that."
qatar's hamad international airport will be expanded to handle up to 50 million passengers a year, according to plans released on wednesday.

kuala lumpur: stocks slumped on wednesday, led by property stocks, politicians and analysts said, after the country's governemnt announced plans to introduce broad-ranging economic reforms.

"the reforms come as the government seeks to address concerns over its domestically-based industrial sector and to diversify its economy," one analyst said.

the government said it had agreed to create a new 4.7 trillion ringgit ($1.2 trillion) sovereign wealth fund to strengthen the country's finances, in addition to an additional 1.5 trillion ringgit ($400 billion) fund for development.

the move was seen as a bid by the government to shore up its finances, which are already being stretched by rising public debt and slowing economic growth.

the information minister said the government had also decided to introduce a new 10-year bond program, as well as a 15-year bond program, to meet its financing needs.

"these measures will help to diversify the government's sources of financing and reduce its reliance on domestic banks," he said.

the news sent shares of property developers and infrastructure companies tumbling, with the index of the kuala lumpur stock exchange falling 2.3%.

in addition, the government announced plans to introduce a new 3% corporate income tax, which could hit companies in the oil and gas sector.

the move was also seen as a bid to strengthen the ringgit, which has been under pressure in recent months.

the ringgit fell 0.5% against the us dollar, bringing it to 4.2370.

the news also sent the ringgit against other major currencies sliding, with the ringgit falling 0.2% against the euro to 4.2277 and 0.5% against the dollar.

the news sent the ringgit against the dollar falling 0.5% to 4.2370.

SoftBank clinches deal to take over WeWork – sources

NEW YORK, Oct 22 (Reuters): SoftBank Group Corp agreed to spend more than $30 billion to buy the remote-working startup WeWork,どうも at an on-paper valuation for the company of $36 billion, a person familiar with the matter and a source with knowledge of the situation said.

The deal is a striking reversal for WeWork, which was once seen as a high-flying start-up but has struggled since its unwieldy $47 billion valuation was laid bare in public filings last spring. While WeWork employees in New York saw the news of the potential deal as a sign that they had made it through a tough year, the sources said the company is valued at considerably less than the $15 billion in cash we saved from the WeWork deal.

The structure of the deal would see WeWork founder and co-CEO Adam Neumann lose control of the company as SoftBank will have immediate voting control over a majority of WeWork’s board of directors. SoftBank’s purchase of WeWork’s stake will be in two parts: a tender offer for up to $3 billion to existing WeWork shareholders and an additional $2.9 billion in debt.

The deal’s price marks a dramatic fall from the blank-check company’s $47 billion valuation in January when SoftBank and other investors agreed to take a 80% stake in the company, giving WeWork a 80% ownership.

In the tender offer for up to $3 billion to existing WeWork shareholders, SoftBank will offer $57.2 million in cash for each of WeWork’s shares, which is a 57% premium over the company’s current market price of $37.2 million.

SoftBank will provide $5.8 billion in debt to WeWork, which will be on a 10% interest rate, with the term to be determined. The deal is expected to close in the first quarter of 2020.

The deal terms are expected to include a special provision that would allow WeWork to rehire Neumann as a consultant.

SoftBank will provide a further $1 billion in debt to WeWork to support its operations, which will be on a 10% interest rate with the term to be determined.

A prototype flying taxi has achieved speed in excess of 100 mph (160 kph) in German tests, underscoring progress toward a high-speed air taxi startup Lillium expounds on plans.

The Lillium Jet, a single-seat electric jet built by Lillium AG of Germany, flew its latest test flight last week over a location near Munich in Germany. The test flight lasted for more than 15 minutes over a distance of about 8 miles (13 kilometers) at a speed of more than 100 mph (160 kph).

The test flight was the latest milestone in Lillium's development of its air taxi. The company has been working on the Lillium Jet for several years and has raised tens of millions of dollars in funding from investors, including BMW Group and Boeing.

"We are delighted with the outcome of the test flight," said Lillium CEO Volker Zlotorzynski. "The performance of the Lillium Jet is in line with our expectations and demonstrates the progress we have made toward achieving our goal of offering a viable alternative to airports and highways.

"Our next steps are to continue refining the design and performance of the Lillium Jet, and to begin testing it in real-world scenarios. We believe this will be a significant step forward in the development of air taxis, and we are excited to see what the future holds for this technology.

"We are committed to making air taxis a reality, and we believe the Lillium Jet is an important step in that direction. We look forward to working with our partners and stakeholders to bring this technology to market as soon as possible.

The Lillium Jet is designed to operate on short takeoff and landing pads, which would allow it to access remote areas that are currently difficult to reach by road. This would be particularly useful in areas where roads are not well-developed or where there are no airports.

"We believe the Lillium Jet has the potential to revolutionize transportation, and we are excited to see how it performs in real-world scenarios," said Zlotorzynski.

"Our goal is to bring the Lillium Jet to market as soon as possible, and we are committed to working with our partners and stakeholders to make this a reality.

"We look forward to seeing the Lillium Jet in operation, and we are confident that it will provide a valuable alternative to traditional transportation methods.

"We are excited to see how the Lillium Jet performs in real-world scenarios, and we are committed to continuing our development work to make this technology a reality.

"We believe the Lillium Jet has the potential to change the way we think about transportation, and we are excited to see how it performs in real-world scenarios."
Tokyo Olympics to go green, help other cities strike gold

China gets 2nd track meet on global Diamond League circuit

MONACO, Oct 22, (AP): The Diamond League circuit adds a meeting in Monaco next season, when it shifts to 15-16, 2020, in a competition that will also feature at Zurich, held on Sept 5 in the first stop in the 2021 world championships host.

The challenge is also to limit the impact of high humidity and temperature. These include asking companies to mitigate climate risks, urban experts said. In Innovations such as roads that reflect infrared rays to cut road surface reflect, hot weather and more frequent typhoons, the Games are in the summer. So the participants need to be involved in meeting the goal of being a zero-carbon event, which will continue even after the Games," she said.

"Hotter summers are a challenge, but we are taking all measures possible to reduce the impact on athletes and visitors," Fujino said.

These include asking companies to adopt sun-reflecting pavements, use plants, vapour sprays, sprinkling water and a resin-based material that can cool areas and cool zones in the city.

"Some innovations will be adjusted for the heat, with interventions such as heat reducing pavements and a roof-based material that can cool areas that can be easy to set up at any weather conditions," Fujino said.

In Group A, Tokyo Olympics to go green, help other cities strike gold. The International Olympic Committee’s (IOC) sustainability strategy, http://bit.ly/33bF65P, sets out to minimize the use of carbon footprints, ensure new construction and refurbishments are planned to take into account the environment, and limit the event’s greenhouse gas emissions.

Olympians of the Tokyo Olympics

The performance moved Tolles from 59th off standings.

Preliminary and Qualifying Games aim to offset all carbon emissions generated, said Fujino, an environmental activist and former environment minister.

The Olympics are a big event, so it is important to have a green Olympics, he said.

"The big picture is I want to have a shot at the Tokyo Olympics to go green, help other cities strike gold. It would have been a big success, but we also want to use the opportunity for sustainable event, with innovations that can be adopted in Tokyo and elsewhere even after the Games," Fujino said.

"The aim of the Games is to improve the urban environment and make it more sustainable," he said.

The challenge is also to limit the impact on athletes and visitors. These include asking companies to mitigate climate risks, urban experts said. India sweep series against S. Africa

NEW DELHI Oct 22 (RTS): India completed a sweep series against South Africa on Tuesday to consolidate their lead in the World Test Championship, with Rohit Sharma providing the icing on the cake by successfully reinventing himself as a Test opener.

Rohit, who has won the Man of the Match award for the second straight Test in the series, scored an unbeaten 212 to help his side to a 39-run win over the tourists on Tuesday. In the first two Tests, he scored 189 and 96, before being dismissed by an innings and 202 balls.

The 28-year-old Opener, who has had a difficult past couple of years, said, “I thought they were ruthless in every aspect of the game. They were better than us in the slip department, fast bowling department, and batting as well.”

He added, “We were dominated pretty much throughout the Test. India will be particularly pleased with Rohit’s off-season return into a Test opener after struggling lower in the batting order in his debut Test career.”

The limited-overs stalwart, the only batsman to have a 529-run World Test Championship series, was adjudged man-of-the-match for his 212, his maiden Test double hundred, in India’s first innings total of 497.

Rohit’s performance was pivotal as the tourists were made to follow on for the second time in the series. South Africa were all out for 133 in their second innings, with India winning by an innings and 264 runs.

“Making things happen on pitch, that’s what I did today,” Rohit said after collecting his fourth man-of-the-match award. “I’m thankful to the management, to the players and said the administrators would try to find out who is behind this conspiracy.”

Paramaneek claims silver as Sen takes bronze

NATIONAL BOWLING CHAMPIONSHIP

Kifli wins gold at Asian Bowling Championship

ARAB TIMES, WEDNESDAY, OCTOBER 23, 2019

BOWLING

Asad Taqi praised the excellent opening performances of South Korean and Japanese bowlers.

Meanwhile, the Deputy Board Chairman of the Asian Bowling Federation, Sheikh Talal of the World Bowling Federation and Professionalism upheld by the President of the championship, stressing that the organizers deserve the winners of the Asian Bowling Championship, which is being held in Kuwait under the auspices of His Highness the Amir of Kuwait, Sabah Al-Salim al-Ahmed al-Sabah.

The Asian Bowling Championship continues through eight days of competition in the men’s and women’s 11-bowling event, which is due to end on the Oct 30, with 32 players from Asian nations competing.

In yesterday’s contest, Sharlin rhumai Shulah from Malaysia won the women’s gold medal.

Dhaka Oct 22 (RTK): Bangladesh’s cricket board lashed out at the players who walked out on the game by threatening to stop playing. The Bangladesh Cricket Board (BCB) President Nazmul Hassan said that the board had been open to discussions, but once the players walked out, the board had to take action.

He said, “If the players don’t want to play, they won’t. What will you do if I ask you to do something you don’t want to do? I don’t understand why you have to stop playing for the demands.”

If anyone wants to talk, the doors are open for them,” he said, adding that players were not answering calls.

He said, “I don’t want to press the button. If they don’t want to play, they won’t. What will you do if I ask you to do something you don’t want to do? I don’t understand why you have to stop playing for the demands. If anyone wants to talk, the doors are open for them,” he said, adding that players were not answering calls.

It's going to be a battle royal on that gainline. Did you give up on your way to winning a game. "One of the biggest reasons they give me a chance," he added. "I did that to myself. That's why I made that choice." He also said: "I can watch everyone's game, I can watch everyone's game, I can watch everyone's game. There's a lot of different things that are going on in that sense that something would have to happen. If you look at what we've done as a team in the past... we've won a lot of games, we've had some great wins. We've had some great losses, but we've learned from those losses. We've been able to change a few things in our way of thinking.

Cheika has been very vocal about his intentions to keep playing and he wants to continue to drive the Wallabies forward. He is confident that the team can improve and become one of the best in the world. Cheika also believes that the Wallabies can learn from other successful teams around the world and use that knowledge to improve their own game.

Cheika has been praised for his leadership and his ability to keep the team strong and focused on their goals. He has been a key figure in the team's success and has shown that he is willing to make tough decisions to keep the team moving forward.

Cheika has been a strong supporter of the Wallabies and has been a vocal advocate for the team. He has been a key figure in the team's development and has been a strong leader for the team in recent years. He has been a key figure in the team's success and has shown that he is willing to make tough decisions to keep the team moving forward.
